Summary of PHARMAC decisions

EFFECTIVE 1 APRIL 2003

Extended Listing (page 15)

- Timolol maleate eye drops 0.25% and 0.5% (Timoptol) – Retail pharmacy-specialist. Timoptol eye drops will continue to be listed fully subsidised until 31 May 2003 due to the recall of Apotex's brand of timolol eye drops 0.25% and 0.5% (Apo-Timolol).

Changes to Sole Subsidised Supply (pages 8-14)

- Refer to the bold entries in the sole supply tables

Decreased subsidy (pages 19-23)

- Pancreatic enzyme cap EC 10,000 BP u lipase, 9,000 BP u amylase and 210 BP u protease (Creon 10000) - Retail pharmacy - specialist
- Dipyridamole tab long-acting 150mg and cap long-acting 150mg (Pytazen SR and Persantin PL) – Special Authority available
- Ethinyloestradiol tab 35mg with 500mg norethisterone and 7 inert tab (Norimin and Brevinor 28)
- Terazosin tab 7 x 1mg and 7 x 2mg (Hytrin BPH Starter Pack) and tab 2mg and 5mg (Hytrin BPH)
- Triazolam tab 250mg (Halcion and Hypam)

Timolol and betaxolol eye drops

The Timoptol brand of timolol 0.25% and 0.5% eye drops will continue to be listed, fully subsidised, on the Pharmaceutical Schedule until 31 May 2003. Apotex has informed PHARMAC that it is still unable to supply Apo-Timolol (0.25% and 0.5%) eye drops hence the extension of the listing of Timoptol eye drops until 31 May 2003.

Apo-Betaxolol eye drops 0.5% are also still unavailable. As explained in the February Pharmaceutical Schedule Update, there is an alternative strength of betaxolol hydrochloride eye drops listed on the Pharmaceutical Schedule, Betoptic S (betaxolol 0.25%). PHARMAC has been informed that additional doses may not be required if patients switch to the lower strength (Betoptic S) but this must be checked with the prescriber before the prescription is dispensed. All queries should be referred to Apotex 0800 657 876.

Alpha blockers – reference pricing

From 1 April 2003 terazosin hydrochloride (Hytrin BPH) will be reference priced to doxazosin mesylate (Dosan) as shown on page 20 of this Update. The manufacturer of Hytrin BPH has reduced the price of Hytrin BPH. However the price reduction does not meet the new subsidy for Hytrin BPH 2 mg and 5 mg tablets so patients will incur a manufacturer's surcharge.

Fluticasone (Flixotide) metered dose inhalers – price reduction

Effective 1 April 2003 GlaxoSmithKline (GSK) has reduced the price of Flixotide metered dose inhalers (MDIs) to the level of subsidy which means they will be listed fully subsidised on the Pharmaceutical Schedule. Even though GSK has been temporarily discounting stock some patients may have had to pay a manufacturer's surcharge. GSK's reduction of the price will ensure that all patients prescribed Flixotide MDIs will have access to a fully subsidised inhaler.

PHARMAC is also co-ordinating an asthma management campaign (in conjunction with stakeholders including the Asthma and Respiratory Foundation of New Zealand, New Zealand Guidelines Group and the New Zealand College of Pharmacists) to encourage people to self-manage their asthma, and take the correct dose of their asthma medicine. The campaign is scheduled to run throughout 2003.

Asthma Campaign - update

Asthma Campaign media promotion

Patient support resources, including posters will be distributed to surgeries and pharmacies in early April. This will be followed by a media campaign including radio and press advertising. The main message of this media promotion will be to invite patients with asthma to discuss their asthma management with their health professional.

Asthma Fundamentals training programme

Subsidised training (Asthma Fundamentals) will be available to practice nurses, respiratory educators, etc. The Asthma and Respiratory Foundation of New Zealand can be contacted for further information on phone (04) 499 4592.

A customised version of the Asthma Fundamentals programme will also be subsidised for pharmacists. The College of Pharmacists can be contacted for further information on phone (04) 802 0030

Campaign resources on PHARMAC website

As the Campaign progresses, information resources will be posted on the PHARMAC Website (www.pharmac.govt.nz). Should you have any questions, PHARMAC can be contacted on 0800 66 00 50.

Approved specialists - antiretrovirals – 1 April 2003

TAURANGA	Dr Charles Beresford	Prof. David Teele
Dr Neil Graham	Dr Charles Newhook	

Looking forward

This section is designed to alert both pharmacists and prescribers to possible future changes. It may assist pharmacists to manage stock levels and keep prescribers up-to-date with proposals to change the Pharmaceutical Schedule.

Proposals under consideration

The following areas of health care funding are currently under consideration. The PHARMAC Board will be reviewing these proposals, and the decisions taken will be published in future Updates. The dates represented below are the earliest date that these proposals may be implemented.

Possible decisions for implementation 1 May 2003

- Topical combination corticosteroids – subsidy reduction
- Citalopram – listing new brand (Celapram) and reduction in additional subsidy available on Cipramil
- Glyceryl trinitrate (Nitrolingual Pumpspray) – listing new pack size (250 dose)

Changes to Restrictions

Effective 1 March 2003

134 IMATINIB MESYLATE - Special Authority - access by application

Cap 100 mg 4,800.00 120 ✓ **Glivec**

Special Authority criteria and guidelines for Glivec:

Application forms are available from, and prescriptions should be sent to:

The Glivec Coordinator Tel: 09 580 9176 Fax: 09 580 9205 Email: murray@ppc.govt.nz
Level 3, Unisys House, 650 Great South Road, Penrose, Private Bag 92 522, AUCKLAND

Special Authority criteria for CML - access by application

- a) Funded for patients with diagnosis (confirmed by a haematologist) of a chronic myeloid leukaemia (CML) in blast crisis, accelerated phase, or in chronic phase **after failure of interferon-alpha therapy**.
- b) Maximum dose of 600 mg/day for accelerated or blast phase, and 400 mg/day for chronic phase CML
- c) Subsidised for use as monotherapy only.
- d) Initial approvals valid seven months.
- e) Subsequent approval(s) are granted on application and are valid for six months. The first re-application (after seven months) should provide details of the haematological response. The third re-application should provide details of the cytogenetic response after 14–18 months from initiating therapy. All other re-applications should provide details of haematological response, and cytogenetic response if such data is available. Applications to be made and subsequent prescriptions can be written by a haematologist or an oncologist.

Guideline on discontinuation of treatment for patients with CML

- a) Prescribers should consider discontinuation of treatment if after 6 months from initiating therapy a patient did not obtain a haematological response as defined as any one of the following three levels of response:
 - complete haematologic response (as characterised by an absolute neutrophil count (ANC) > 1.5 x 10⁹/L, platelets > 100 x 10⁹/L, absence of peripheral blood (PB) blasts, bone marrow (BM) blasts < 5% (or FISH Ph+ 0–35% metaphases), and absence of extramedullary disease); or
 - no evidence of leukaemia (as characterised by an absolute neutrophil count (ANC) > 1.0 x 10⁹/L, platelets > 20 x 10⁹/L, absence of peripheral blood (PB) blasts, bone marrow (BM) blasts < 5% (or FISH Ph+ 0–35% metaphases), and absence of extramedullary disease); or
 - return to chronic phase (as characterised by BM and PB blasts < 15%, BM and PB blasts and promyelocytes < 30%, PB basophils < 20% and absence of extramedullary disease other than spleen and liver).
- b) Prescribers should consider discontinuation of treatment if after 18 months from initiating therapy a patient did not obtain a major cytogenetic response defined as 0–35% Ph+ metaphases.

Special Authority criteria for GIST - access by application

- a) Funded for patients:
 - with a diagnosis (confirmed by an oncologist) of unresectable and/or metastatic malignant gastrointestinal stromal tumour (GIST); and
 - who have immunohistochemical documentation of c-kit (CD117) expression by the tumour.
- b) Maximum dose of 400 mg/day.
- c) Applications to be made and subsequent prescriptions can be written by an oncologist.
- d) Initial and subsequent applications are valid for one year. The re-application criterion is an adequate clinical response to the treatment with imatinib (prescriber determined).

▲ Three months supply may be dispensed at one time if endorsed "certified exemption" by the prescriber.

Changes to Restrictions – effective 1 January 2003

39 ERYTHROPOIETIN BETA- Special Authority

Inj 1,000 u, pre-filled syringe	76.02	6	✓ Recormon
Inj 2,000 u pre-filled syringe	152.04	6	✓ Recormon
Inj 3,000 u pre-filled syringe	228.06	6	✓ Recormon
Inj 4,000 u pre-filled syringe	304.08	6	✓ Recormon
Inj 5,000 u pre-filled syringe	380.10	6	✓ Recormon
Inj 6,000 u pre-filled syringe	456.12	6	✓ Recormon
Inj 10,000 u pre-filled syringe	760.20	6	✓ Recormon

Special Authority - Hospital pharmacy [HP3]

a) Erythropoietin beta is indicated in the treatment of anaemia associated with chronic renal failure (CRF) where no cause for anaemia other than CRF is detected and there is adequate monitoring of iron stores and iron replacement therapy.

b) Erythropoietin beta is to be given only to patients in chronic renal failure with haemoglobin $\leq 100 \text{ g/l}$; and

i) glomerular filtration rate $\leq 30 \text{ ml/min}$ in non diabetic patients; or

ii) glomerular filtration rate $\leq 45 \text{ ml/min}$ in diabetic patients

iii) haemodialysis or peritoneal dialysis patients.

c) Specialist must make application – renal physicians

Note. The Cockcroft-Gault Formula may be used to estimate glomerular filtration rate (GFR) in persons

18 years and over:

$$GFR \text{ (male)} = \frac{(140 - \text{age}) \times \text{Ideal Body Weight (kg)}}{814 \times \text{serum creatinine (mmol/l)}} \text{ (ml/min)}$$

$$GFR \text{ (female)} = \text{Estimated GFR (male)} \times 0.85$$

Section H changes effective 1 March 2003

Changes to Part 1 – General Rules for Hospital Pharmaceuticals

9. Pharmaceutical Cancer Treatments

- 9.1 DHBs are obliged to fund Pharmaceutical Cancer Treatments in accordance with the October 2001 direction from the Minister of Health.
- 9.2 The list of Pharmaceutical Cancer Treatments may be amended from time to time. Additions and/or amendments to Part V of Section H of the Pharmaceutical Schedule require the approval of the PHARMAC Board.
- 9.3 Pharmaceutical Cancer Treatments listed in Part V of Section H may be used in combination with each other, including where such combinations result in admixtures or dilutions that differ from those specified.
- 9.4 Subject to the provisions of clause 9.5, DHBs must not fund Pharmaceuticals for the treatment of cancer or Pharmaceutical Cancer Treatments for indications related to the treatment of cancer, if they are not listed in Part V of Section H of the Pharmaceutical Schedule, unless they have specific Community Exceptional Circumstances approval or permission under Hospital Exceptional Circumstances.
- 9.5 DHBs may fund Pharmaceuticals that are not listed in Part V of Section H of the Pharmaceutical Schedule, and/or Pharmaceutical Cancer Treatments for indications not listed in Part V (or subsidised via Sections A-G) of Section H of the Pharmaceutical Schedule, provided that:
 - (a) such use is first assessed via established review mechanisms within DHB Hospitals involving experienced clinicians;
 - (b) such use is reported to the Exceptional Circumstances Panel within 7 working days of initiating such treatment; and
 - (c) the pharmaceutical or indications approved via this mechanism do not include those that have been assessed by the Pharmacology and Therapeutics Advisory Committee or its cancer treatments sub-committee and were not recommended for inclusion in Part V of Section H of the Pharmaceutical Schedule.
- 9.6 Applications to add pharmaceuticals, and add or amend indications for Pharmaceutical Cancer Treatments, to Part V of Section H of the Pharmaceutical Schedule may be made in writing by pharmaceutical suppliers and/or clinicians to PHARMAC. Applications should follow PHARMAC's *Guidelines for Submissions to PTAC for New Chemical Entity Pharmaceuticals and Recommended methods to derive clinical inputs for proposals to PHARMAC*, copies of which are available from PHARMAC or PHARMAC's website.
- 9.7 Applications made under clause 9.6 must be assessed by HPAC, PHARMAC, PTAC and/or relevant sub-committees of PTAC.

Changes to Part II – Pharmaceuticals under National Contracts
