## Summary of PHARMAC decisions

EFFECTIVE 1 OCTOBER 2009

### New listings (pages 17 to 18)

- Clarithromycin (Klamycin) tab 500 mg - subsidy by endorsement – maximum of 14 tabs per prescription, subsidised for helicobacter pylori eradication
- Blood glucose diagnostic test meter (CareSens POP and CareSens II) meter – subsidy by endorsement
- Blood glucose diagnostic test strip (CareSens) blood glucose test strips x 50 and lancets x 5 – subsidy by endorsement
- Heparin sodium (Pfizer) inj 1,000 iu per ml, 5 ml (10 and 50 inj pack) and inj 5,000 iu per ml, 5 ml
- Heparanised saline (Pfizer) inj 10 iu per ml, 5 ml
- Raltegravir potassium (Isentress) tab 400 mg – Special Authority – Hospital pharmacy [HP1]
- Alendronate sodium with cholecalciferol (Fosamax Plus) tab 70 mg with cholecalciferol 5600 iu – Special Authority – Retail pharmacy
- Aprepitant (Emend Tri-Pack) cap 2 x 80 mg and 1 x 125 mg – Special Authority – Retail pharmacy
- Risperidone (Risperon) oral liq 1 mg per ml, 30 ml
- Latanoprost (Hysite) eye drops 50 µg per ml, 2.5ml OP – Retail pharmacy – Specialist
- Aminoacid formula without phenylalanine (PKU Anamix Infant) infant formula, 400 g OP – Special Authority – Hospital pharmacy [HP3]
- Aminoacid formula without phenylalanine (PKU Lophlex LQ) liquid (berry, citrus and orange) 62.5 ml OP and 125 ml OP – Special Authority – Hospital pharmacy [HP3]
- Elemental formula (Pepti Junior Gold) powder 450 g OP - Special Authority - Hospital pharmacy [HP3]

### Changes to restrictions (pages 19 to 25)

- Phytomenadione (Konakion MM) inj 2 mg per 0.2 ml and inj 10 mg per ml, 1 ml – also subsidised for oral administration
- Clarithromycin tab 250 mg and grans for oral liq 125 mg per 5 ml – amended Special Authority criteria
- Alendronate for osteoporosis – amended Special Authority criteria
- Levodopa with carbidopa (Sinemet CR) tab long-acting 200 mg with carbidopa 50 mg – removal of Retail pharmacy-Specialist restriction
- Mask for spacer device – amended restriction criteria
- Spacer device – amended restriction criteria

**Decreased subsidy (pages 26 to 29)**

- Pioglitazone (Actos) tab 15 mg, 30 mg and 45 mg
- Blood glucose diagnostic test strip (Accu-Chek Performa) blood glucose test strips
- Calamine (ABM).crm, aqueous, BP; and lotn, BP
- Leuprorelin (Eligard) inj 7.5 mg, 22.5 mg, 30 mg and 45 mg
- Levodopa with carbidopa tab long-acting 200 mg with carbidopa 50 mg (Sinemet CR) and tab 250 mg with carbidopa 25 mg (Sinemet)
- Carboplatin (Carboplatin Ebewe) inj 10 mg per ml, 45 ml and 10 mg per ml, 100 ml
- Dorzolamide hydrochloride with timolol maleate (Cosopt) eye drops 2% with timolol maleate 0.5%

**Increased subsidy (pages 26 to 29)**

- Hydrocortisone acetate (Colifoam) rectal foam 10 %, CFC free (14 applications)
- Atropine sulphate (AstraZeneca) inj 600 µg, 1 ml
- Vitamin A with Vitamins D and C (Vitadol C) soln 1000 u with Vitamin D 400 u and ascorbic acid 30 mg per 10 drops
- Heparin sodium (Mayne) inj 5,000 iu per ml, 1 ml
- Potassium chloride (Span-K) tab long-acting 600 mg
- Clonidine TDDS 2.5 mg, 100 µg per day (Catapres-TTS-1); TDDS 5 mg, 200 µg per day (Catapres-TTS-2); and TDDS 7.5 mg, 300 µg per day (Catapres-TTS-3)
- Clonidine hydrochloride (Catapres) tab 150 µg
- Clonidine hydrochloride (Catapres) inj 150 µg per ml, 1 ml
- Clobetasol propionate (Dermol).crm 0.05% and oint 0.05%
- Betamethasone valerate (Beta Scalp) scalp app 0.1%
- Clobetasol propionate (Dermol) scalp app 0.05%
- Oxytocin (Syntocinon) inj 5 iu per ml, 1 ml and 10 iu per ml, 1 ml
- Oxytocin (Syntometrine) inj 5 iu with ergometrine maleate 500 µg per ml, 1 ml
- Hydrocortisone (Douglas) tab 5 mg and 20 mg
- Methylprednisolone sodium succinate (Solu-Medrol) inj 500 mg
- Flucloxacillin sodium (AFT) grans for oral liq 125 mg per 5 ml and 250 mg per 5 ml
- Gentamicin sulphate (Pfizer) inj 40 mg per ml, 2 ml
- Naproxen tab 250 mg (Noflam 250) and 500 mg (Noflam 500)
- Baclofen (Pacifen) tab 10 mg
- Quinine sulphate (Q 300) tab 300 mg

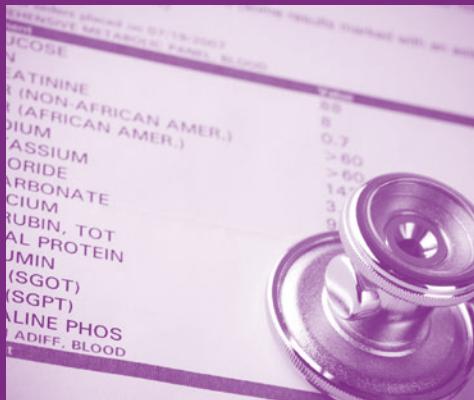

## **Summary of PHARMAC decisions – effective 1 October 2009 (continued)**

- Morphine hydrochloride (RA-Morph) oral liq 1 mg per ml, 2 mg per ml, 5 mg per ml, and 10 mg per ml
- Morphine sulphate (Sevredol) tab immediate-release 10 mg and 20 mg
- Moclobemide (Apo-Moclobemide) tab 150 mg and 300 mg
- Clonidine hydrochloride (Dixarit) tab 25 µg
- Carboplatin (Carboplatin Ebewe) inj 10 mg per ml, 5 ml and 10 mg per ml, 15 ml
- Carboplatin (Baxter) inj 1 mg for ECP
- Sodium cromoglycate (Rex) nasal spray, 4%

## Clarithromycin for helicobacter pylori eradication

The Special Authority requirement for helicobacter pylori eradication therapy on clarithromycin 250 mg tablets will be removed from 1 October 2009. This is because clarithromycin 500 mg tablets will be listed with endorsement criteria for h. pylori from 1 October 2009. Please note that prescriptions are considered endorsed if clarithromycin is prescribed in conjunction with a proton pump inhibitor and either amoxicillin or metronidazole.

This means clarithromycin (Klamycin) 500 mg tablets will be subsidised by endorsement with a maximum quantity of 14 tablets per prescription for eradication

of h. pylori. The existing clarithromycin Special Authority criteria for mycobacterial infections will remain unchanged.

Losec Hp7 OAC will remain fully funded for the treatment of h. pylori although the supplier (AstraZeneca) has advised that it will discontinue this pack once its current stocks are exhausted (anticipated to be in May 2010).

## Diabetes Management Products – subsidy changes, new listing

From 1 October 2009, the subsidy and price will be reduced for the Accu-Chek Performa brand of blood glucose diagnostic test strips. The Accu-Chek Performa brand of blood glucose diagnostics test meters will also remain fully subsidised. A confidential rebate will apply to the test strips and meters subsidised in the community.

The CareSens II and CareSens POP blood glucose diagnostic test meters will be

listed fully subsidised from 1 October 2009. These are compatible with the newly listed CareSens test strips.

Lancets in combination with the supply of the CareSens brand of blood glucose diagnostic test strips will be fully subsidised from 1 October 2009. We understand that the supplier of CareSens intends to provide patients with the choice of a free meter swap out.

## Aprepitant – new listing

From 1 October 2009, the antiemetic aprepitant (Emend Tri-Pack) capsules will be fully subsidised under Special Authority criteria for patients undergoing

highly emetogenic chemotherapy and/or anthracycline-based chemotherapy for the treatment of malignancy. See page 17 for further information.

## Raltegravir potassium – new listing

The antiretroviral medication raltegravir potassium (Isentress) 400 mg tablets will be subsidised from 1 October 2009. Isentress will be subsidised under the same Special Authority criteria that apply to currently

funded antiretrovirals (Non-nucleoside Reverse Transcriptase Inhibitors, Nucleoside Reverse Transcriptase Inhibitors and Protease Inhibitors).

## Fosamax Plus – new strength subsidised

A new strength of Fosamax Plus tablets (alendronate sodium 70 mg with cholecalciferol 5,600 iu) will be subsidised from 1 October 2009. It is subject to the same Special Authority criteria as for the existing

strength of Fosamax Plus. The currently listed presentation of Fosamax Plus (alendronate sodium with cholecalciferol 2,800 iu) will be delisted in approximately 6 months.

## Tender awarded for latanoprost eye drops

From 1 October 2009 Hysite (latanoprost 50 µg per ml) 2.5 ml eye drops will be listed on the Pharmaceutical Schedule. Hysite is manufactured and supplied by Pfizer who also manufacture and supply the current brand Xalatan. Hysite will be the Sole Subsidised Supply brand of latanoprost 50 µg per ml eye drops from 1 March 2010 until 30 June 2012.

## Spacer devices and masks

From 1 October 2009, the Pharmaceutical Schedule rule allowing spacer devices and masks to be subsidised on Wholesale Supply Order (WSO) when written by a DHB paediatrician will be removed. This change

correctly aligns DHB budgetary expenditure for their own use of spacers and masks. DHB hospitals will be able to order via their own internal systems.

## Vitadol C fully subsidised

Vitadol C oral solution (vitamin A with vitamins D and C) will be fully subsidised without restriction from 1 October 2009. This

is a result of a concurrent subsidy increase and price decrease.

## Phytomenadione injection – subsidised for oral use

Roche Products is discontinuing supply of their chewable phytomenadione 10 mg tablet formulation. As a result, phytomenadione injections will be subsidised for oral administration from 1 October 2009. This change is necessary as section 2.2.17 of the General Rules in the Pharmaceutical Schedule state that substances in a form intended for intravenous delivery, prescribed for a purpose

other than by injection, are not subsidised unless specified in Sections B to G of the Schedule.

PHARMAC notes that the medicine datasheet includes instructions on the oral use of the injection formulation. The Konakion MM brand of phytomenadione injections are registered for oral use.

## Tender News

Sole Subsidised Supply changes – effective 1 November 2009

Chemical Name	Presentation; Pack size	Sole Subsidised Supply brand (and supplier)
Atenolol	Tab 50 mg; 500 tab	Pacific Atenolol (Mylan)
Atenolol	Tab 100 mg; 500 tab	Pacific Atenolol (Mylan)
Hydrocortisone	Powder; 25 g	ABM (ABM)
Nevirapine	Oral suspension 10 mg per ml; 240 ml	Viramune Suspension (Boehringer Ingelheim)
Nevirapine	Tab 200 mg; 60 tab	Viramune (Boehringer Ingelheim)

## Looking Forward

*This section is designed to alert both pharmacists and prescribers to possible future changes to the Pharmaceutical Schedule. It may also assist pharmacists, distributors and wholesalers to manage stock levels.*

### Possible decisions for implementation 1 November 2009

- Azathioprine (Azamun) tab 50 mg – price and subsidy increase
- Blood glucose diagnostic test meter (On Call Advanced) – new listing
- Blood glucose diagnostic test strips with lancets (On Call Advanced) – new listing
- Codeine phosphate (Douglas) powder 25 g – price and subsidy increase
- Lansoprazole (Solox) – price and subsidy decrease
- Lithium carbonate (Douglas) cap 250 mg – price and subsidy increase
- Mesalazine (Pentasa) tab long-acting 500 mg – price and subsidy decrease
- Nitrazepam (Nitrados) tab 5 mg – price and subsidy increase
- Oxazepam (Ox-Pam) tab 10 and 15 mg – price and subsidy increase

- SA0988 0657** | Special Authority for Waiver of Rule
- Initial application — (Helicobacter pylori infections) only from a general practitioner or relevant specialist. Approvals valid for 6 months for applications meeting the following criteria:
- Both:
- 1 Eradication of Helicobacter pylori in patient with proven infection; and
  - 2 Peptic ulcer disease proven by endoscopy.
- Note: Maximum of two prescriptions (two courses) per patient.
- Initial application — (Mycobacterial infections) only from a respiratory specialist, infectious disease specialist or paediatrician.
- Approvals valid for 2 years for applications meeting the following criteria:
- Any of the following:
- 1 Mycobacterium Avium Intracellulare Complex infections in patient with AIDS; or
  - 2 Atypical and drug-resistant mycobacterial infection; or
  - 3 All of the following:
    - 3.1 Prophylaxis against disseminated Mycobacterium Avium Intracellulare Complex infection; and
    - 3.2 HIV infection; and
    - 3.3 CD4 count  $\leq$  50 cells/mm<sup>3</sup>.
- Renewal —(Mycobacterial infections) only from a respiratory specialist, infectious disease specialist or paediatrician. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.
- 105 ALENDRONATE FOR OSTEOPOROSIS
- SA0990 0948** | Special Authority for Subsidy
- Initial application — (Underlying cause – Osteoporosis) from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:
- Any of the following:
- 1 History of one significant osteoporotic fracture demonstrated radiologically and documented bone mass density (BMD)  $\geq$  2.5 standard deviations below the mean normal value in young adults (i.e. T-Score  $\leq$  -2.5); or
  - 2 History of one significant osteoporotic fracture demonstrated radiologically, and either the patient is elderly, or densitometry scanning cannot be performed because of major logistical, technical or pathophysiological reasons. It is unlikely that this provision would apply to many patients under 75 years of age; or
  - 3 History of two significant osteoporotic fractures demonstrated radiologically; or
  - 4 Documented T-Score  $\leq$  -3.0; or
  - 5 **A 10-year risk of hip fracture  $\geq$  3%, calculated using a published risk assessment algorithm (e.g. FRAX or Dubbo) which incorporates BMD measurements.**
- Initial application — (Underlying cause – glucocorticosteroid therapy) from any relevant practitioner. Approvals valid for 1 year for applications meeting the following criteria:
- Both:

## Changes to Restrictions - effective 1 October 2009 (continued)

*continued...*

- 1 The patient is receiving systemic glucocorticosteroid therapy ( $\geq 5$  mg per day prednisone equivalents) and has already received or is expected to receive therapy for at least three months; and
- 2 Either:
  - 2.1 The patient has documented BMD  $\geq 1.5$  standard deviations below the mean normal value in young adults (i.e. T-Score  $\leq -1.5$ ); or
  - 2.2 The patient has a history of one significant osteoporotic fracture demonstrated radiologically.

Renewal —(Underlying cause was, and remains, glucocorticosteroid therapy) from any relevant practitioner.  
Approvals valid for 1 year where the patient is continuing systemic glucocorticosteroid therapy ( $\geq 5$  mg per day prednisone equivalents).

Renewal — (Underlying cause was glucocorticosteroid therapy but patient now meets the 'Underlying cause - osteoporosis' criteria) from any relevant practitioner. Approvals valid without further renewal unless notified for applications meeting the following criteria:

Any of the following:

- 1 History of one significant osteoporotic fracture demonstrated radiologically and documented bone mass density (BMD)  $\geq 2.5$  standard deviations below the mean normal value in young adults (i.e. T-Score  $\leq -2.5$ ); or
- 2 History of one significant osteoporotic fracture demonstrated radiologically, and either the patient is elderly, or densitometry scanning cannot be performed because of major logistical, technical or pathophysiological reasons. It is unlikely that this provision would apply to many patients under 75 years of age; or
- 3 History of two significant osteoporotic fractures demonstrated radiologically; or
- 4 Documented T-Score  $\leq -3.0$ ; or
- 5 **A 10-year risk of hip fracture  $\geq 3\%$ , calculated using a published risk assessment algorithm (e.g. FRAX or Dubbo) which incorporates BMD measurements.**

Notes:

- a) Evidence used by National Institute for Health and Clinical Excellence (NICE) guidance indicates that patients aged 75 years and over who have a history of significant osteoporotic fracture demonstrated radiologically are very likely to have a T-Score  $\leq -2.5$ , and therefore do not require BMD measurement for treatment with bisphosphonates.
- b) Osteoporotic fractures are the incident events for severe (established) osteoporosis, and can be defined using the WHO definitions of osteoporosis and fragility fracture. The WHO defines severe (established) osteoporosis as a T-score below -2.5 with one or more associated fragility fractures. Fragility fractures are fractures that occur as a result of mechanical forces that would not ordinarily cause fracture (minimal trauma). The WHO has quantified this as forces equivalent to a fall from a standing height or less.
- c) In line with the Australian guidelines for funding alendronate, a vertebral fracture is defined as a 20% or greater reduction in height of the anterior or mid portion of a vertebral body relative to the posterior height of that body, or a 20% or greater reduction in any of these heights compared to the vertebral body above or below the affected vertebral body.

1—Endometriosis; and

2—Either:

- 2.1 6 months treatment with medroxyprogesterone acetate, danazol or dimetriose has proven ineffective; or
- 2.2 The patient has failed to tolerate the treatment with medroxyprogesterone acetate, danazol or dimetriose for 6 months.

Note: The maximum treatment period for a GnRH analogue is:

- 3 months to assess whether surgery is appropriate
- 3 months for infertile patients after surgery
- 6 months for patients with symptoms of endometriosis After the first 3 months patients should be assessed to determine whether there has been a satisfactory response to the first 3 months treatment.

Initial application — (Precocious puberty) only from a paediatrician or endocrinologist. Approvals valid for 1 year where the patient is affected by gonadotropin dependent precocious puberty.

Renewal — (Breast or prostate cancer) from any medical practitioner. Approvals valid for 1 year where the treatment remains appropriate and the patient is benefiting from treatment.

Note: If a patient had an approval for any GnRH analogue prior to 1 July 2006 the applicant is required to submit a fresh initial application, not a renewal application.

Renewal — (Endometriosis) from any medical practitioner. Approvals valid for 3 months for applications meeting the following criteria:

Either:

1—Both:

- 1.1 There has been a satisfactory response to the first 3 months treatment; and
- 1.2 Surgery is inappropriate; or

2—The first three months of therapy did not follow surgery for infertility.

Note: If a patient had an approval for any GnRH analogue prior to 1 July 2006 the applicant is required to submit a fresh initial application, not a renewal application.

Renewal — (Precocious puberty) only from a paediatrician or endocrinologist. Approvals valid for 1 year where the treatment remains appropriate and the patient is benefiting from treatment.

Note: If a patient had an approval for any GnRH analogue prior to 1 July 2006 the applicant is required to submit a fresh initial application, not a renewal application.

- 83 AZITHROMYCIN – Subsidy by endorsement
- Maximum of 2 tab per prescription; can be waived by Special Authority see SA0964
  - Up to 4 tab available on a PSO
  - Subsidised only if prescribed for patients with uncomplicated urethritis or cervicitis proven or presumed to be due to chlamydia trachomatis and their sexual contacts and prescription or PSO is endorsed accordingly; **can be waived by Special Authority see SA0964.**
- Tab 500 mg ..... 5.95      2 OP      **✓ Arrow-Azithromycin**

- 89 ENTECAVIR – Special Authority see SA0977 – Retail pharmacy
- Tab 0.5 mg ..... 400.00      30      **✓ Baraclude**
- SA0977** Special Authority for Subsidy
- Initial application only from a gastroenterologist or infectious disease specialist. Approvals valid without further renewal unless notified for applications meeting the following criteria:
- All of the following:
- Patient has confirmed Hepatitis B infection (HBsAg positive for more than 6 months); and
  - Patient is Hepatitis B nucleoside analogue treatment-naive; and
  - Entecavir dose 0.5 mg/day; and
  - Either:
    - ALT greater than upper limit of normal; or
    - Bridging fibrosis or cirrhosis (Metavir stage 3 or greater) on liver histology; and
  - Either:

4.1 ALT greater than upper limit of normal; or

4.2 Bridging fibrosis or cirrhosis (Metavir stage 3 or greater) on liver histology; and

5 Either:

---	---------------------------------	--

## Changes to Restrictions - effective 1 September 2009 (continued)

*continued...*

- 5.1 HBeAg positive; or
- 5.2 patient has  $\geq$  2,000 IU HBV DNA units per ml and fibrosis (Metavir stage 2 or greater) on liver histology; and
- 6 No continuing alcohol abuse or intravenous drug use; and
- 7 Not co-infected with HCV, HIV or HDV; and
- 8 Neither ALT nor AST greater than 10 times upper limit of normal; and
- 9 No history of hypersensitivity to entecavir; and
- 10 **No** previous documented lamivudine resistance (either clinical or genotypic).

Notes:

- Entecavir should be continued for 6 months following documentation of complete HBeAg seroconversion (defined as loss of HBeAg plus appearance of anti-HBe plus loss of serum HBV DNA) for patients who were HBeAg positive prior to commencing this agent. This period of consolidation therapy should be extended to 12 months in patients with advanced fibrosis (Metavir Stage F3 or F4).
- Entecavir should be taken on an empty stomach to improve absorption.

## Changes to Restrictions - effective 1 September 2009 (continued)

*continued...*

2—Corticosteroid dependent patients who have failed on cytotoxic therapy:

Initial application — (Endogenous uveitis) only from a relevant specialist. Approvals valid for 2 years where the patient suffers from endogenous uveitis:

Initial application — (Severe rheumatoid arthritis) only from a rheumatologist. Approvals valid for 2 years for applications meeting the following criteria:

All of the following:

1—Severe rheumatoid arthritis; and

2—The patient must be either unresponsive to or unable to tolerate, both sulphasalazine and methotrexate; and

3—Patients must have 2 serum creatinine test results within the normal range within the three months prior to initiation of therapy.

Renewal — (Severe atopic dermatitis) only from a dermatologist. Approvals valid for 6 months where the treatment remains appropriate and the patient is benefiting from treatment.

Renewal — (Indications other than severe atopic dermatitis) only from a dermatologist, rheumatologist or relevant specialist. Approvals valid for 2 years where the treatment remains appropriate and the patient is benefiting from treatment.

Guidelines for use of cyclosporin A in rheumatoid arthritis

Monitoring:

All patients require frequent monitoring for creatinine levels and blood pressure:

- fortnightly, in the first three months of therapy and then monthly, if results are stable;
- if dose is increased or there is a rise in serum creatinine or blood pressure, then more frequent monitoring is required.

Contraindications:

Cyclosporin A is contraindicated in patients with the following conditions:

- current or past malignancy;
- uncontrolled hypertension;
- renal dysfunction (abnormal serum creatinine for age and sex);
- immunodeficiency and neutropenia;
- abnormally low white blood cell count or platelet count; or
- liver function tests more than twice the upper limit of normal.

Caution in use:

- age above 65 years;
- controlled hypertension;
- use of anti-epileptic medications;
- use of ketoconazole, fluconazole, trimethoprim, erythromycin, verapamil, and diltiazem;
- concurrent or previous use of alkylating agents such as cyclophosphamide;
- use of any experimental drug within the past three months;
- premalignant conditions such as leukoplakia, monoclonal paraproteinæmia, myelodysplastic syndrome and dysplastic naevi;
- active infection may necessitate temporary discontinuation;
- pregnancy and lactation.

Therapy should be discontinued if there has been no improvement after 6 months with the patient on the maximum tolerated dose. For further information please consult the data sheet.

### 166 PILOCARPINE ORAL LIQUID

Pilocarpine 4% 6% eye drops qs

## Section H changes to Part IV

Effective 1 October 2009

L-ORNITHINE L-ASPARTATE (LOLA) **S29**

Sach 5 g mg

For patients with chronic hepatic encephalopathy who have not responded to treatment with lactulose

Note – correction of pack size only.

PAMIDRONATE DISODIUM

Inj 3 mg per ml, 10 ml

Pamisol

Aredia

Inj 6 mg per ml, 10 ml

Pamisol

Inj 9 mg per ml, 10 ml

Pamisol

For malignant hypercalcaemia, metastatic breast cancer – predominant lytic bone metastases, myeloma with lytic bone metastases, control of pain due to lytic bone metastases in addition to standard care (analgesics + radiotherapy); Gaucher disease with established bone disease.

Effective 1 August 2009

PEGFILGRASTIM

Inj 6 mg per 0.6 ml prefilled syringe

Indefinite supply for any appropriate indication for the management of patients with cancer.

PHARMAC is the Government agency responsible for deciding which medicines are subsidised for New Zealanders. It manages spending on pharmaceuticals for the District Health Boards, and ensures that a comprehensive list of medicines (the Pharmaceutical Schedule) is subsidised for New Zealanders, and that the list of medicines continues to grow to meet the needs of patients.
