- Vexazone (pioglitazone) tablets 15 mg, 30 mg and 45 mg
- Zopiclone Actavis (zopiclone) tab 7.5 mg

Sole Supply for these products will commence 1 March 2016.

## Ziprasidone capsules – delay to tender brand change

Due to a delay in manufacture, the Zusdone brand of ziprasidone 20 mg, 40 mg, 60 mg and 80 mg capsules will now be listed from 1 November 2015. The subsidy for the Zeldox brand will reduce from 1 January 2016 and Zeldox will be delisted from 1 April 2016. The subsidy by endorsement and hospital restrictions will be removed from ziprasidone tablets on 1 January 2016.

## Citalopram hydrobromide tablets – delay to tender brand change

Due to a delay in manufacture, the PSM Citalopram brand of citalopram 20 mg tablets will not be listed from 1 October 2015 as previously advised, but will be delayed until further notice.

The Arrow-Citalopram brand will remain fully subsidised. We will notify of the new listing date for PSM Citalopram when this information comes to hand.

## Rex Medical inhalers – new listings

The following asthma products will be listed from 1 October 2015:

- Floair (fluticasone) aerosol inhaler 50 mcg, 125 mcg and 250 mcg;
- RexAir (fluticasone with salmeterol) aerosol inhaler 50 mcg fluticasone with salmeterol 25 mcg, and 125 mcg fluticasone with salmeterol 25 mcg;
- Meterol (salmeterol) aerosol inhaler 25 mcg; and
- SalAir (salbutamol) aerosol inhaler 100 mcg.

Note that these products are being listed in addition to the currently listed brands. Patients will not be required to change their inhalers as a result of this listing. For more information on the inhalers, contact Rex Medical on Tel 09 574 6060.

## TNF alpha inhibitors – changes to funding of etanercept and adalimumab

There will be a number of changes to the funding of TNF-inhibitor medicines etanercept (Enbrel) and adalimumab (Humira/Humira Pen) over the next few months. These are:

- From 1 October 2015, the subsidy for all etanercept presentations will reduce.
- From 1 January 2016, etanercept will be the first-line funded TNF inhibitor medicine for new rheumatology and dermatology patients. Funding for adalimumab will be limited to patients who are intolerant of, or whose disease has not responded to, etanercept.
- There will be no change to the funding of adalimumab for:
  - o current patients using it (for any indication), or
  - o new patients who have Crohn's disease or fistulising Crohn's disease, or
  - o patients with juvenile idiopathic arthritis (JIA) with pre-existing uveitis

More information can be found on our website at <http://www.pharmac.health.nz/news/notification-tnf-inhibitors/>

## MS treatments and Special Authority renewals

Fingolimod and natalizumab are two treatments for Multiple Sclerosis (MS) funded via Special Authority (SA) since 1 November 2014. Only a neurologist or general physician (internal medicine specialist; not general practitioners) can apply to renew the SA for these medicines. The application is made to a separate committee and cannot be completed using the usual online process. This committee meets monthly.

As it has been close to a year since these new treatments were funded, some patients have an SA approval number that will soon be expiring. PHARMAC has written to all clinics to remind them of the need to renew the SA approval for patients.

You may wish to remind patients that they need to have their neurologist or general physician renew their SA approval for them so they can continue to access funded treatment. This may help to prevent patients presenting without a valid SA for their treatment.

---

## Gabapentin – changes to funding

From 1 November 2015, the Neurontin brand of gabapentin 100 mg, 300 mg and 400 mg capsules will be funded under the same Special Authority criteria that currently apply to other brands of gabapentin (Arrow-Gabapentin and Nupentin).

From 1 November 2015, the 600 mg Neurontin tablets will be delisted. More information can be found on our website at <http://www.pharmac.health.nz/news/notification-tnf-inhibitors/>

---

## Dietitian prescribing – changes

We are changing the rules to support the new prescribing rights of dietitians. Dietitians have recently been classified as designated prescribers under the Medicines Act 1981.

From 1 October 2015, we will be deleting Rule 3.5 of the Pharmaceutical Schedule, which limits subsidies to specific products. This means that dietitians will be able to prescribe anything for subsidy that is consistent with their scope of practice. This would include cholecalciferol (vitamin D), zinc, and pancreatic enzymes.

---

## Clinicians Renal Vit – new listing

Clinicians Renal Vit capsules will be listed from 1 October 2015 subject to Special Authority criteria for patients with chronic kidney disease (CKD) who are on dialysis or with CKD Grade 5.

## **Abilify (aripiprazole) 5 mg tablets – new listing**

A new 5 mg strength of aripiprazole (Abilify) will be listed from 1 October 2015. The Special Authority criteria applying to the existing 10 mg, 15 mg, 20 mg and 30 mg strengths, will apply to the 5 mg strength.

Note that a “maximum of one tablet per day” rule will apply to the 5 mg strength. Prescriptions for more than one 5 mg tablet per day will not be funded.

---

## **Zarontin (ethosuximide) 250 mg capsules – supply disruption**

Pfizer has advised of a supply disruption to Zarontin (ethosuximide) 250 mg capsules. Pfizer has secured a limited quantity of an alternative 100 capsule pack size which will be listed temporarily from 1 October 2015. Zarontin oral liquid 250 mg per 5 ml remains available.

Stat dispensing will be removed temporarily from ethosuximide capsules and oral liquid from 1 October 2015. Normal supply is expected to resume at the end of October 2015. For further information, contact Pfizer Customer Service on 0800 736 363.

---

## **Lasix (furosemide [frusemide]) oral solution – product change to ambient temperature storage**

Sanofi has advised of a change to Lasix (furosemide [frusemide]) oral solution to a product that does not need refrigeration. A new Pharmacode for the changed product will be listed from 1 October 2015. The old Pharmacode will be delisted once supplies have been exhausted. Note that the datasheet on Medsafe’s website will be updated once supplies of the old stock have been exhausted.

---

## **Dulcolax (bisacodyl) 5 mg suppositories – delisting**

Boehringer Ingelheim discontinued the supply of Dulcolax (bisacodyl) 5 mg suppositories in early 2013. Dulcolax 5 mg suppositories will be delisted from 1 December 2015. There is likely to be minimal stock remaining in New Zealand. The bisacodyl 10 mg suppository remains available.

## **Mogine (lamotrigine) dispersible tablets – delisting**

The Mogine brand of 25 mg, 50 mg and 100 mg dispersible tablets has been discontinued and will be delisted from 1 April 2016. The Lamictal, Arrow and Logem brands remain funded.

---

## **Tolvon (mianserin hydrochloride) 30 mg tablets – delisting**

MSD has advised that supplies of Tolvon (mianserin hydrochloride) 30 mg tablets have now been exhausted. Tolvon will be delisted from 1 April 2016.

---

## **Flecainide 100 mg tablets – discontinuation**

The Tambocor brand of flecainide 100 mg tablets will be delisted from 1 April 2016. The 100 mg tablets have been discontinued to eliminate the potential for confusion between the 100 mg tablets and the 100 mg long-acting capsules which can result in prescribing and dispensing errors. The 50 mg (immediate-release) tablets will remain funded.

---

## **Co-Renitec (enalapril maleate with hydrochlorothiazide) tablets – delisting**

MSD has advised that supplies of Co-Renitec (enalapril maleate with hydrochlorothiazide) 20 mg/12.5 mg tablet have now been exhausted. Co-Renitec will be delisted from 1 April 2016.

---

## **Stemetil (prochlorperazine) 25 mg suppositories – discontinuation**

Sanofi has advised that it intends to discontinue the supply of Stemetil (prochlorperazine) suppositories 25 mg from January 2016.

## News in brief

- A Brand Switch Fee will apply to dispensings of Air Flow Escitalopram (**escitalopram**) from 1 October 2015 to 31 December 2015.
- An 840 g pack of Sustagen Hospital Formula (**oral feed**) will be listed from 1 October 2015 to replace the 900 g pack which will be delisted from 1 April 2016.
- A 2,500 U strength of FEIBA injection (**factor eight inhibitors bypassing fraction**) will be listed from 1 October 2015. Note that FEIBA injections are XPharm meaning that they cannot be dispensed and claimed by a community pharmacy.
- Nutrini Energy RTH is incorrectly listed as paediatric enteral feed with fibre 1.5 kcal/ml. Nutrini Energy RTH does not contain fibre. From 1 October 2015, Nutrini Energy RTH will be correctly listed as **paediatric enteral feed 1.5 kcal/ml**. Note that Nutrini Energy Multifibre is correctly listed as containing fibre.
- Pfizer has notified that Ponstan (**mefenamic acid**) 250 mg capsules, in the bottle presentation, have been discontinued from 1 April 2016. The blister presentation remains subsidised.
- AFT has notified that supply of Tofranil (**imipramine hydrochloride**) tab 25 mg has resumed following an out-of-stock.

## Changes to General Rules

Effective 1 October 2015

### 14 3.5 Dietitians' Prescriptions

The following provisions apply to every Prescription written by a Dietitian:

3.5.1 Prescriptions written by a Dietitian for a Community Pharmaceutical will only be subsidised where they are for either:

- a) special foods, as listed in Section D; or
- b) any other Pharmaceutical that has been identified in Section D of the Pharmaceutical Schedule as being able to be prescribed by a Dietitian, providing that the products being prescribed are not classified as Prescription Medicines or Restricted Medicines.

3.5.2 For the purposes of Dietitians prescribing pursuant to this clause 3.5, the prescribing and dispensing of these products is required to be in accordance with regulations 41 and 42 of the Medicines Regulations 1984.
