New listings

Temozolomide 20 mg capsules – temporary new listing

The Temaccord brand of 20 mg temozolomide capsules will be listed temporarily from 1 August 2017 to cover a potential shortage of Orion Temozolomide in this strength. The other capsule strengths of Orion Temozolomide will continue to be available.

Changed listings

Thalidomide dispensing in the community

From 1 August 2017, the restriction on thalidomide will change from PCT only to Retail pharmacy – Specialist, meaning that it can only be claimed from community pharmacies. Only pharmacies registered with Celgene's risk management programme, i-access®, and Celgene's ordering portal will be able to dispense thalidomide.

If pharmacies are already dispensing lenalidomide, they will be able to dispense thalidomide without further training. To learn more about registering to dispense and order thalidomide contact Celgene on 0800 526 529 or visit www.iaccesscelgene.com.

Some patients may choose to pick up their thalidomide from the community pharmacy part way through the prescription. In this case, the hospital pharmacy will make a certified true copy of the prescription and give the original prescription back to the patient for it to be dispensed in community pharmacy. The usual co-payment will apply for the first community pharmacy dispensing in this situation.

The Special Authority number will not change for existing patients. The only change will be the prefix, it will change from PCTX (which is used for DHB PCT-only Special Authorities) to CHEM (which is used in community). The Ministry of Health Sector Operations will be working to make sure the Special Authorities work. If you have any issues/concerns about the Special Authority contact them on 0800 243 666 Option 1.

Prednisolone acetate 1% eye drops – stat removed

"Three months dispensed all-at-once" (stat) dispensing will be removed from prednisolone acetate 1% eye drops until further notice due to a potential shortage of stock.

Other

Ferric carboxymaltose infusions in the community – delayed decision

There will be a delay in the decision on the proposal to list ferric carboxymaltose (Ferinject) in the community for iron deficiency anaemia. This means that Ferinject will not be listed from 1 August 2017. We are taking more time to carefully consider the feedback to the consultation and hope to decide soon.

Antiretroviral medicines prescribers

The Ministry of Health has recently added Dr Karen Benattar to the list of approved Specialists who can make Special Authority applications for antiretroviral medicines.

News in brief

- **Benzatropine mesylate** (Omega) inj 1 mg per ml, 2 ml. This product is now registered with Medsafe, so is no longer supplied via section 29 of the Medicines Act, 1981.
- **Dexamethasone phosphate (Max Health)** inj 4 mg per ml, 2 ml ampoule will be delisted from 1 February 2018. The supplier has discontinued the 5 injection pack, the ten injection pack remains available.
- Naproxen (Naprosyn SR 750 and Naprosyn SR 1000) tab long-acting 750 mg and 1 g,
 90 tablet packs will be delisted from 1 January 2018. 28 tablet blister packs remain listed.
