We will be listing the Varenicline Pfizer brand of varenicline tartrate tablets from 1 January 2019. There will be two pack sizes, a starter pack containing 11 x 0.5 mg tablets and 42 x 1 mg tablets (enough for the first 4 weeks' supply) and a 56 tablet pack of 1 mg tablets for the remainder of the 12-week treatment.

The subsidy on Champix brand products will decrease from 1 March 2019 and will be delisted from 1 June 2019. Varenicline Pfizer will be the sole subsidised brand from 1 June 2019.

From 1 January 2019, the restriction requiring a minimum of 2 week's treatment will be changed to a minimum of 4 weeks treatment to reflect the new 4 week initiation pack.

#### **Iron polymaltose**

The Ferrosig brand of iron polymaltose injection 50 mg per ml, 2 ml ampoule will be listed without restriction from 1 January 2019.

#### **Colecalciferol**

Puria oral liquid containing 188 mcg of colecalciferol per ml (7,500 iu of vitamin D per ml). This is about 10 mcg (400 iu) of colecalciferol per drop.

Puria is presented in a dropper bottle. Drops of the liquid can be administered straight into the mouth, or can be added to food or drink. One bottle of Puria provides one drop per day for three months.

From 1 January 2019, the Max Health brand of calcium gluconate 10% injection, 10 ml ampoule, will be listed. This product will be supplied via section 29 of the Medicines Act, 1981.

## Changed listings

### Insulin pump brand change

Some patients being switched from an Animas to a Tandem insulin pump have been told they can return unused Animas consumables to their pharmacy to exchange for Tandem consumables. There is no funding for exchanges. Patients can be dispensed the new consumables only on a new (or repeat) prescription. Pharmacies can suggest the patient contact the supplier, NZMS, regarding return and funding of exchanged consumables as NZMS are managing this.

Please note the restrictions on insulin pump consumables. The maximum is 3 sets per prescription and 13 sets per year. The default dispensing for insulin pump consumables is monthly. Consumables should only be dispensed stat (three months all-at-once) when access exemption applies.

### Aflibercept – Special Authority amendment

The Special Authority criteria applying to aflibercept will be amended from 1 January 2019. The criteria allowing patients currently treated with ranibizumab to continue second line treatment with aflibercept will be removed.

### Metolazone tablets

From 1 January 2019, Special Authority approval will no longer be required to access funded metolazone 5 mg tablets. The Special Authority form will not be available, and applications will be unable to be processed for a few days prior to 1 January 2019.

## Stock issues

### Medroxyprogesterone acetate (Provera) tab 2.5 mg and 5 mg

Stat dispensing (three months all-at-once) will be removed from medroxyprogesterone acetate 2.5 mg and 5 mg tablets from 1 January 2019 due to a supply issue.

An alternative brand of the 2.5 mg and 5 mg presentations, Provera S29, will be listed from 1 January 2019 in a pack size of 56 tablets. Provera S29 will be supplied via section 29 of the Medicines Act 1981.

## **Paracetamol 500 mg tablets (blister pack) – new brand listings**

We will be listing two new brands of paracetamol 500 mg tablets (blister pack), Pharmacy Health and Paracetamol Pharmacare from 1 January 2019, to help manage the shortage.

API is awaiting registration of both brands. We don't expect them to be available at the start of January. We will inform you when these are registered and available for purchase. This is expected to be sometime during January.

Further supplies of the current paracetamol blister pack have arrived in New Zealand and are being released to wholesalers. The additional stock is estimated to meet current restricted demand for paracetamol however it is not sufficient to remove the dispensing restrictions. Wholesalers will continue to manage supply to pharmacy.

The restrictions currently applying to paracetamol 500 mg tablet dispensing will continue to apply until further notice. Once we are confident that there is sufficient safety stock in the supply chain, we will remove the restrictions. We are hopeful that this issue will be resolved early in the New Year.

More information, and any further updates, can be found on our website page:

## **Delistings**

### **Interferon alfa-2b (Intron-A)**

The supplier of Intron-A (interferon alfa-2b) has discontinued all three strengths of their multidose pen, 18 m iu, 30 m iu and 60 m iu. The interferon alfa-2a presentation remains available at this time and could be considered as an alternative.

### **Beclomethasone dipropionate (Alanase) nasal spray**

The supplier of Alanase (beclomethasone dipropionate) metered aqueous nasal sprays has discontinued both the 50 mcg per dose and 100 mcg per dose packs. Current supplies are expected to be exhausted mid-2019 and will be delisted from 1 January 2020. These products are partially funded.

We have included beclomethasone dipropionate metered aqueous nasal spray in the 2018/19 tender. If a tender is accepted, this will mean that there will be a fully funded product available.

## Bonvit – ispaghula (psyllium) husk

Bonvit (ispaghula (psyllium) husk) was listed as an alternative when Konsyl-D was not available. As Konsyl-D is now available, Bonvit will be delisted 1 March 2019.
