## News Stories – January 2020 Update

### New tender listings for 1 January 2020

- Enalapril maleate (Acetec) tab 5 mg, 10 mg and 20 mg

### Famotidine – new listing

PHARMAC has secured supply of an alternative H2 antagonist as a result of the previously notified pharmacy level recall of all batches of ranitidine 150 mg and 300 mg tablets.

Our clinical advice is that some patients may be able to be transitioned to a proton pump inhibitor (PPI). The currently funded proton pump inhibitors include omeprazole, pantoprazole and lansoprazole.

For ranitidine patients who are intolerant to proton pump inhibitors, PHARMAC has secured supply of another H2 antagonist, famotidine, from Link Pharmaceuticals.

- Famotidine tab 20 mg and 40 mg is currently listed in Section H of the Pharmaceutical Schedule.
- From 1 January 2020, Link Pharmaceutical's Famotidine Hovid brand of famotidine tab 20 mg (Pharmacode: 2580586) will be listed in Section B of the Pharmaceutical Schedule.
- From 1 March 2020, Link Pharmaceutical's Famotidine Hovid brand of famotidine tab 40 mg (Pharmacode: 2580594) will be listed in Section B of the Pharmaceutical Schedule.

Please note that Famotidine Hovid has not been approved by Medsafe, so it will need to be supplied under Section 29 of the Medicines Act 1981. Details regarding the use and supply of unapproved medicines are available on the Medsafe website.

### Dosulepin 25 mg capsules – Section 29 alternative listed

From 1 December 2019, the Dosulepin Mylan brand of 25 mg capsules was listed. PHARMAC has listed this brand for existing patients using this medicine, as the previously available brand (Dopress) was discontinued by the supplier in 2019. The endorsement of no new patients remains in place.

Please note that Dosulepin Mylan has not been approved by Medsafe, so it will need to be supplied under Section 29 of the Medicines Act 1981. Details regarding the use and supply of unapproved medicines are available on the Medsafe website.

## Vitadol C – relisting

After receiving enquires from DHBs notifying PHARMAC that they still had residual stock of Vitadol C, PHARMAC has relisted Vitadol C from 1 January 2020 to allow for this stock to be dispensed and claimed. There is no stock available to order from the supplier and this relisting is only to allow use of any existing stock on hand. Vitadol C will be delisted from 1 July 2020.

---

## Lidocaine [lignocaine] hydrochloride gel 2%, urethral syringe – brand change

PHARMAC has made the decision to change the sole subsidised brand of lidocaine [lignocaine] hydrochloride gel 2%, urethral syringe from Cathejell to Instillagel Lido.

- Instillagel Lido will be listed from 1 January 2020 and will become the sole subsidised brand in the community and hospital settings on 1 April 2020, following a 3-month transition period.
- Cathejell will be delisted from the Pharmaceutical Schedule from 1 April 2020.

More information about this decision is available on our website, at [www.pharmac.govt.nz/news/notification-2019-12-11-lidocaine/](http://www.pharmac.govt.nz/news/notification-2019-12-11-lidocaine/).

---

## Buprenorphine with naloxone sublingual tablets – brand change reminder

The funded brand of buprenorphine with naloxone (2 mg with 0.5 mg and 8 mg with 2 mg) sublingual tablets has changed from Suboxone to Buprenorphine Naloxone BNM.

- From 1 November 2019, the Buprenorphine Naloxone BNM brand was fully funded.
- From 1 April 2020, Buprenorphine Naloxone BNM will be the only funded brand of buprenorphine with naloxone. Suboxone will no longer be funded.
- A Brand Switch Fee will apply to dispensings of Buprenorphine Naloxone BNM from 1 April 2020 to 1 July 2020. This may be claimed once per patient.

More information about this brand change can be found on our website, at [www.pharmac.govt.nz/medicines/my-medicine-has-changed/buprenorphine-with-naloxone/](http://www.pharmac.govt.nz/medicines/my-medicine-has-changed/buprenorphine-with-naloxone/).

---

## Arrow-Morphine LA tab – discontinuation

Arrow-Morphine LA tablets 100 mg are being discontinued by the supplier. M-Eslon 10 mg, 30 mg, 50 mg, and 100mg long-acting caps remain listed and will have Sole Supply from 1 January 2020. Our clinical advice has indicated that the 100 mg long-acting caps are a suitable funded alternative to the tablets.

---

## Atomoxetine – further delays

We have been advised by Generic Partners of a further delay to the listing of its brand of atomoxetine capsules (10 mg, 18 mg, 25 mg, 40 mg, 60 mg, 80 mg, and 100 mg). This was scheduled to be listed from 1 January 2020. This has now been delayed to **1 April 2020**. Generic Partners noted that Eli Lilly will continue supplying Strattera in the interim. Removal of Special Authority and Sole supply will also be delayed.

---

## Multiple sclerosis treatments – co-payment reinstated 1 January 2020

From 1 January 2020 the pharmaceutical co-payment will be reinstated on dispensings for:

- interferon beta-1-alpha (Avonex and Avonex Pen),
- interferon beta-1- beta (Betaferon), and
- glatiramer acetate (Copaxone).

In July 2019 we made some changes to the distribution arrangements for three treatments for Multiple Sclerosis - interferon beta-1-alpha (Avonex and Avonex Pen), interferon beta-1- beta (Betaferon) and glatiramer acetate (Copaxone). These are now all dispensed from community pharmacy.

During the transition from direct distribution (to patients) to community pharmacy dispensing, the pharmaceutical co-payment was waived. The waiver period ends at the end of December 2019, meaning patients will be charged a co-payment from 1 January 2020.

---

## Rivastigamine – delayed listing

We have been advised by Generic Partners of a delay in listing their brand of Rivastigamine patches 4.6 mg and 9.5 mg. These will now be listed from 1 February 2020. Exelon patches remain listed and available.
