Pediasure and Pulmocare – discontinuation

Abbott Nutrition has notified PHARMAC of its decision to discontinue paediatric oral feed 1kcal/ml (Pediasure) liquid 200 ml OP (chocolate, strawberry and vanilla), and CORD oral feed 1.5kcal/ml (Pulmocare) liquid 237 ml OP.

- Abbott expect stock of all flavours of Pediasure 200 ml to be exhausted by 1 March 2020. These products (Pharmacodes 2444844, 2444860 and 2444852) will be delisted from **1 September 2020**.
- Abbott expect stock of Pulmocare be exhausted by 1 April 2020. This product (Pharmacode 599336) will be delisted from **1 October 2020**.

There is currently an alternative pack size subsidised for Pediasure: Pediasure (vanilla flavour only) 250 ml can (Pharmacode 2444879).

There is no current alternative subsidised for Pulmocare.

Alectinib capsules – adding wastage claiming

The Medsafe approved Data Sheet for alectinib recommends a reduced dose in people with underlying severe hepatic impairment, and for the management of certain adverse events.

Given the likely patient numbers, the pack size and list price of this item per pack, PHARMAC is adding the wastage claimable rule to the listing for alectinib cap 150 mg in Section B of the Pharmaceutical Schedule from **1 February 2020**.

Famotidine – change in pack size

In January 2020, Link Pharmaceuticals advised PHARMAC of an error in the pack size of famotidine tab 20 mg. This is currently subsidised in Section B of the Pharmaceutical Schedule as a 1,000 pack size. However, this is instead being supplied as a 100 tab pack size.

The Pharmaceutical Schedule will be updated to reflect the 100 tablet pack size details from 1 February 2020. Until this is updated, claims can be placed against the currently listed Pharmacode.

- Famotidine Hovid s29 (Pharmacode 2580586) is currently listed at \$49.13 per 1,000 tab pack
- Famotidine Hovid s29 (Pharmacode 2581752) will be listed from **1 February 2020** at \$4.91 per 100 tab pack.

Cilazapril with hydrochlorothiazide – endorsement added to manage stock for planned discontinuation

PHARMAC has been notified by Apotex of the discontinuation of cilazapril with hydrochlorothiazide (Apo-Cilazapril/Hydrochlorothiazide). We are adding the subsidy by endorsement restriction to the listing of cilazapril with hydrochlorothiazide from 1 March 2020 to enable remaining stock to be prioritised for existing patients. We anticipate that, based on current usage, the remaining stock will be exhausted by July 2020. From **1 March 2020** the endorsement will be as follows:

Subsidy by endorsement – Subsidised for patients who were taking cilazapril with hydrochlorothiazide prior to 1 March 2020 and the prescription is endorsed accordingly. Pharmacists may annotate the prescription as endorsed where there exists a record of prior dispensing of cilazapril with hydrochlorothiazide.

This will mean that prescribers will need to consider an alternative funded medication for people needing to start on an ACE/ARB with diuretic combination product. Our clinical advice has indicated that funded alternatives include losartan or quinapril with hydrochlorothiazide. Prescribers should also start transitioning patients currently on cilazapril with hydrochlorothiazide to alternative treatments.

Influenza vaccine – 2020 season listings

A paediatric formulation of influenza vaccine (Afluria Quad Junior (2020 formulation)) will be listed in the Pharmaceutical Schedule for children from 6 to 35 months of age from 1 February 2020. The Pharmacode for influenza vaccines will change each year as the vaccine contains different influenza strains from year to year. The Schedule listings will include the season year to make it clear which season the vaccine is approved for.

From **1 February 2020**, influenza vaccine listings will be amended as follows:

- Afluria Quad (2020 formulation) inj 60 mcg in 0.5 ml syringe (quadrivalent vaccine) (Pharmacode 2581434) will be listed in Sections I and H of the Pharmaceutical Schedule, subject to restriction criteria.
- Afluria Quad Junior (2020 Formulation) inj 30 mcg in 0.25 ml syringe (paediatric quadrivalent vaccine) (Pharmacode 2581442) will be listed in Sections I and H of the Pharmaceutical Schedule, subject to restriction criteria and Xpharm will apply.
- The 2019 season formulation vaccines FluQuadri, Influvac Tetra and Afluria Quad (Pharmacode 2559471) inj 60 mcg in 0.5 ml syringe (quadrivalent vaccine) will be delisted.
- The 2019 season formulation vaccine Fluarix Tetra inj 60 mcg in 0.5 ml syringe (paediatric quadrivalent vaccine) will be delisted.

Rivastigmine patches – change in funded brand

A new brand of rivastigmine patches will be listed from **1 February 2020**.

- Generic Partners brand will be listed from **1 February 2020**.
- Exelon brand will be reference priced from **1 April 2020** and delisted from **1 July 2020**.

It is important to ensure transdermal patches are applied correctly. Please refer to the Medsafe approved Data Sheet for information on how to apply the patch correctly.

More information about this brand change can be found on our website, at www.pharmac.govt.nz/medicines/rivastigmine.
