Changes to pack size descriptions

Pharmac is currently working with Health New Zealand to support implementation of the new Health Sector Agreements and Payments (HSAAP) System, which will be taking on the role of processing community pharmacy claims later this year.

To ensure that pharmacy claims will be calculated and paid correctly under the new HSAAP system, Pharmac has amended Schedule listings for a number of products to align the Schedule pack size descriptions with that in the New Zealand Medicines Terminology (NZMT). For example, some injections have previously had a pack size measured in ml, whereas now it is in vials or bags. Similarly, some special foods have been measured in ml, but now have a pack size of 1 bottle.

For the affected products, the Schedule listing has been updated, and replacement Pharmacodes have been issued. These changes are effective from 1 April 2025.
