## HOSPITAL MEDICINES LIST RESTRICTIONS CHECKLIST

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

| PRESCRIBER  |            |    |       |   | PATIENT:  |  |
|---|------------|----|-------|---|---|--|
| Name:   |            |    |       |   | Name:   |  |
| Ward:   |            |    |       |   | NHI:  |  |
| Eltrombopag   |            |    |       |   |   |  |
| Re-a  | Hospital.  |    |       |   | ce with a protocol or guideline that has been endorsed by the Health NZ   |  |
|   | and<br>and | Ο  |       | nt has had a splenectomy                            | ed after therapy of 3 months each (or 1 month for rituximab)  |  |
|   |            | or | Ο     |   | s per microlitre and has evidence of significant mucocutaneous bleeding<br>100 platelets per microlitre and has evidence of active bleeding<br>100 platelets per microlitre   |  |
| INITIATION – idiopathic thrombocytopenic purpura - preparation for splenectomy<br>Re-assessment required after 6 weeks<br>Prerequisites (tick box where appropriate)<br>O Prescribed by, or recommended by a haematologist, or in accordance with a protocol or guideline that has been endorsed by the Health NZ<br>Hospital.<br>and<br>O The patient requires eltrombopag treatment as preparation for splenectomy  |            |    |       |   |   |  |
| CONTINUATION – idiopathic thrombocytopenic purpura - post-splenectomy<br>Re-assessment required after 12 months<br>Prerequisites (tick box where appropriate)<br>O Prescribed by, or recommended by a haematologist, or in accordance with a protocol or guideline that has been endorsed by the Health NZ<br>Hospital.<br>and<br>O The patient has obtained a response (see Note) from treatment during the initial approval or subsequent renewal periods and further<br>treatment is required<br>Note: Response to treatment is defined as a platelet count of > 30,000 platelets per microlitre |            |    |       |   |   |  |
| INITIATION – idiopathic thrombocytopenic purpura contraindicated to splenectomy   Re-assessment required after 3 months   Prerequisites (tick boxes where appropriate)   O Prescribed by, or recommended by a haematologist, or in accordance with a protocol or guideline that has been endorsed by the Hospital.  |            |    |       |   |   |  |
| and   | and<br>and | Ο  | Two i | Patient has immune thrombocytopenic purpura* with a | n to splenectomy for clinical reasons<br>ed after therapy of 3 months each (or 1 month for rituximab)<br>platelet count of less than or equal to 20,000 platelets per microliter<br>platelet count of 20,000 to 30,000 platelets per microlitre and significant |  |
