Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

| PRESCRIBER | PATIENT: | | |
|---|--|--|--|
| Name: | Name: | | |
| Ward: | NHI: | | |
| Omalizumab | | | |
| endorsed by the Te Whatu Ora Hospital. Patient must be aged 6 years or older and Patient has a diagnosis of severe asthma and Past or current evidence of atopy, documented by skin prick to and Total serum human immunoglobulin E (IgE) between 76 IU/ml and Proven adherence with optimal inhaled therapy including high fluticasone propionate 1,000 mcg per day or equivalent), plus eformoterol 12 mcg bd) for at least 12 months, unless contrain and Patient has received courses of systemic corticosteroids contraindicated or not tolerated Patient has had at least 4 exacerbations needing system defined as either documented use of oral corticosteroids and Patient has an Asthma Control Test (ACT) score of 10 or less and | dose inhaled corticosteroid (budesonide 1,600 mcg per day or long-acting beta-2 agonist therapy (at least salmeterol 50 mcg bd or indicated or not tolerated sequivalent to at least 28 days treatment in the past 12 months, unless inic corticosteroids in the previous 12 months, where an exacerbation is a for at least 3 days or parenteral steroids | | |
| CONTINUATION – severe asthma Re-assessment required after 6 months Prerequisites (tick boxes where appropriate) Prescribed by, or recommended by a respiratory specialist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital. and | | | |
| An increase in the Asthma Control Test (ACT) score of at lease and A reduction in the maintenance oral corticosteroid dose or nur | | | |

HOSPITAL MEDICINES LIST RESTRICTIONS CHECKLIST

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

| PRES | PRESCRIBER | | PATIENT: | |
|--|------------------|--|---|--|
| Name | Name: | | Name: | |
| Ward | Vard: | | NHI: | |
| Oma | alizu | umab - continued | | |
| Re-a | assess requis | ON – severe chronic spontaneous urticaria ssment required after 6 months isites (tick boxes where appropriate) Prescribed by, or recommended by a clinical immunologist or dendorsed by the Te Whatu Ora Hospital. | ermatologist, or in accordance with a protocol or guideline that has been | |
| | and | O Patient must be aged 12 years or older | | |
| | | Patient is symptomatic with Urticaria Activity and Patient has a Dermatology life quality index (| | |
| | and | or Patient has been taking high dose antihistamines (or O Patient has been taking high dose antihistamines (or O Patient has been taking high dose antihistamines (or O Patient has been taking high dose antihistamines (or | e.g. 4 times standard dose) and ciclosporin (> 3 mg/kg day) for at least e.g. 4 times standard dose) and at least 3 courses of systemic corticosteroids | |
| | and | or (> 20 mg prednisone per day for at least 5 days) in O Patient has developed significant adverse effects w | | |
| | | or Treatment to be stopped if inadequate response* for O Complete response* to 6 doses of omalizumab | bllowing 4 doses | |
| CONTINUATION – severe chronic spontaneous urticaria Re-assessment required after 6 months Prerequisites (tick boxes where appropriate) Prescribed by, or recommended by a clinical immunologist or dermatologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital. Patient has previously had a complete response* to 6 doses of omalizumab or | | | | |
| Nete | *1 | Patient has previously had a complete response* to and Patient has relapsed after cessation of omalizumab | o therapy | |
| Note: *Inadequate response defined as less than 50% reduction in baseline UAS7 and DLQI score, or an increase in Urticaria Control Test (UCT) score of less than 4 from baseline. Patient is to be reassessed for response after 4 doses of omalizumab. Complete response is defined as UAS7 less than or equal to 6 and DLQI less than or equal to 5; or UCT of 16. Relapse of chronic urticaria on stopping prednisone/ciclosporin does not justify the funding of omalizumab. | | | | |
