Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

PRESCRIBER	PATIENT:
Name:	Name:
Ward:	NHI:
Amino acid formula	
INITIATION Prerequisites (tick boxes where appropriate)	
Extensively hydrolysed formula has been reasonably trialled for or allergy or malabsorption History of anaphylaxis to cows' milk protein formula or dairy processor Eosinophilic oesophagitis Or Ultra-short gut Or Severe Immune deficiency	or 2-4 weeks and is inappropriate due to documented severe intolerance roducts
CONTINUATION Prerequisites (tick boxes where appropriate)	
An assessment as to whether the infant can be transitioned to been undertaken The outcome of the assessment is that the infant continues to and Amino acid formula is required for a nutritional deficit	a cows' milk protein, soy, or extensively hydrolysed infant formula has require an amino acid infant formula
INITIATION – patients who are currently funded under RS1502 or SA1557 Re-assessment required after 3 months Prerequisites (tick boxes where appropriate)	
O Patient has a valid initiation or renewal approval for extensively and	y hydrolysed formula (RS1502)
O Patient is unable to source funded Aptamil powder at this time and	
The approval only applies to funded dispensings of Neocate G	sold and Neocate Syneo
Note: This criteria is short term funding to cover an out-of-stock situation on some extensively hydrolysed formula powder funded under Hospital Restriction RS1502. There is no continuation criteria under this criterion.	
I confirm that the above details are correct:
