PATIENT:

Name: .....

NHI: .....

Adalimumab (Humira - Alternative brand)

INITIATION – Behcet's disease – severe
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by any relevant practitioner, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has experienced intolerable side effects from adalimumab (Amgevita) following a minimum of 4 weeks treatment

or

- ○ Patient has developed symptoms of loss of disease control following a minimum of 4 weeks treatment with adalimumab (Amgevita) and clinician attributes this loss of disease response to a change in treatment regimen

and

- ○ Patient has received a maximum of 6 months treatment with Amgevita

and

- ○ Patient has previously had a Special Authority approval for the Humira brand of adalimumab for this indication

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

CONTINUATION – Behcet's disease – severe
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by any relevant practitioner, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has had a good clinical response to treatment with measurably improved quality of life

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

INITIATION – Hidradenitis suppurativa
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a dermatologist or Practitioner on the recommendation of a dermatologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has experienced intolerable side effects from adalimumab (Amgevita) following a minimum of 4 weeks treatment

or

- ○ Patient has developed symptoms of loss of disease control following a minimum of 4 weeks treatment with adalimumab (Amgevita) and clinician attributes this loss of disease response to a change in treatment regimen

and

- ○ Patient has received a maximum of 6 months treatment with Amgevita

and

- ○ Patient has previously had a Special Authority approval for the Humira brand of adalimumab for this indication

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 7 days. Fortnightly dosing has been considered

I confirm that the above details are correct:

Adalimumab (Humira - Alternative brand) *- continued*

CONTINUATION – Hidradenitis suppurativa
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a dermatologist or Practitioner on the recommendation of a dermatologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has a reduction in active lesions (e.g. inflammatory nodules, abscesses, draining fistulae) of 25% or more from baseline

and

- ○ The patient has a Dermatology Quality of Life Index improvement of 4 or more from baseline

and

- ○ Adalimumab is to be administered at doses no greater than 40mg every 7 days. Fortnightly dosing has been considered

INITIATION – Psoriasis - severe chronic plaque
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a dermatologist or Practitioner on the recommendation of a dermatologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has experienced intolerable side effects from adalimumab (Amgevita) following a minimum of 4 weeks treatment

or

- ○ Patient has developed symptoms of loss of disease control following a minimum of 4 weeks treatment with adalimumab (Amgevita) and clinician attributes this loss of disease response to a change in treatment regimen

and

- ○ Patient has received a maximum of 6 months treatment with Amgevita

and

- ○ Patient has previously had a Special Authority approval for the Humira brand of adalimumab for this indication

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

Adalimumab (Humira - Alternative brand) *- continued*

CONTINUATION – Psoriasis - severe chronic plaque
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a dermatologist or Practitioner on the recommendation of a dermatologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ Patient had "whole body" severe chronic plaque psoriasis at the start of treatment

and

- ○ Following each prior adalimumab treatment course the patient has a PASI score which is reduced by 75% or more, or is sustained at this level, when compared with the pre-adalimumab treatment baseline value

or

- ○ Following each prior adalimumab treatment course the patient has a Dermatology Quality of Life Index (DLQI) improvement of 5 or more, when compared with the pre-treatment baseline value

or

- ○ Patient had severe chronic plaque psoriasis of the face, or palm of a hand or sole of a foot at the start of treatment

and

- ○ Following each prior adalimumab treatment course the patient has a reduction in the PASI symptom subscores for all 3 of erythema, thickness and scaling, to slight or better, or sustained at this level, as compared to the treatment course baseline values

or

- ○ Following each prior adalimumab treatment course the patient has a reduction of 75% or more in the skin area affected, or sustained at this level, as compared to the pre-adalimumab treatment baseline value

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

INITIATION – Pyoderma gangrenosum
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a dermatologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has experienced intolerable side effects from adalimumab (Amgevita) following a minimum of 4 weeks treatment

or

- ○ Patient has developed symptoms of loss of disease control following a minimum of 4 weeks treatment with adalimumab (Amgevita) and clinician attributes this loss of disease response to a change in treatment regimen

and

- ○ Patient has received a maximum of 6 months treatment with Amgevita

and

- ○ Patient has previously had a Special Authority approval for the Humira brand of adalimumab for this indication

and

- ○ A maximum of 8 doses

I confirm that the above details are correct:

Adalimumab (Humira - Alternative brand) *- continued*

CONTINUATION – Pyoderma gangrenosum
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a dermatologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has demonstrated clinical improvement and continues to require treatment

and

- ○ A maximum of 8 doses

INITIATION – Crohn's disease - adult
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a gastroenterologist or Practitioner on the recommendation of a gastroenterologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has experienced intolerable side effects from adalimumab (Amgevita) following a minimum of 4 weeks treatment, and a maximum of 6 months treatment with Amgevita

or

- ○ Patient has developed symptoms of loss of disease control following a minimum of 4 weeks treatment, and a maximum of 6 months treatment with Amgevita and clinician attributes this loss of disease response to a change in treatment regimen

or

- ○ Patient has Crohn's and is considered to be at risk of disease destabilisation if there were to be a change to current treatment

and

- ○ Patient has previously had a Special Authority approval for the Humira brand of adalimumab for this indication

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

CONTINUATION – Crohn's disease - adult
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a gastroenterologist or Practitioner on the recommendation of a gastroenterologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ CDAI score has reduced by 100 points from the CDAI score when the patient was initiated on adalimumab

or

- ○ CDAI score is 150 or less

or

- ○ The patient has demonstrated an adequate response to treatment, but CDAI score cannot be assessed

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a gastroenterologist or Practitioner on the recommendation of a gastroenterologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ PCDAI score has reduced by 10 points from the PCDAI score when the patient was initiated on adalimumab

or

- ○ PCDAI score is 15 or less

or

- ○ The patient has demonstrated an adequate response to treatment, but PCDAI score cannot be assessed

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

INITIATION – Crohn's disease - fistulising
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a gastroenterologist or Practitioner on the recommendation of a gastroenterologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has experienced intolerable side effects from adalimumab (Amgevita) following a minimum of 4 weeks treatment, and a maximum of 6 months treatment with Amgevita

or

- ○ Patient has developed symptoms of loss of disease control following a minimum of 4 weeks treatment, and a maximum of 6 months treatment with Amgevita and clinician attributes this loss of disease response to a change in treatment regimen

Adalimumab (Humira - Alternative brand) *- continued*

CONTINUATION – Crohn's disease - fistulising
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a gastroenterologist or Practitioner on the recommendation of a gastroenterologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The number of open draining fistulae have decreased from baseline by at least 50%

or

- ○ There has been a marked reduction in drainage of all fistula(e) from baseline as demonstrated by a reduction in the Fistula Assessment score, together with less induration and patient-reported pain

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

INITIATION – Ocular inflammation – chronic
Re-assessment required after 12 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by any relevant practitioner, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has experienced intolerable side effects from adalimumab (Amgevita) following a minimum of 4 weeks treatment, and a maximum of 6 months treatment with Amgevita

or

- ○ Patient has developed symptoms of loss of disease control following a minimum of 4 weeks treatment with Amgevita, and a maximum of 6 months treatment with Amgevita and clinician attributes this loss of disease response to a change in treatment regimen

or

- ○ Patient has uveitis and is considered to be at risk of vision loss if they were to change treatment

and

- ○ Patient has previously had a Special Authority approval for the Humira brand of adalimumab for this indication

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

CONTINUATION – Ocular inflammation – chronic
Re-assessment required after 12 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by any relevant practitioner, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has had a good clinical response following 12 weeks' initial treatment

or

- ○ Following each 12-month treatment period, the patient has had a sustained reduction in inflammation (Standardisation of Uveitis Nomenclature (SUN) criteria < ½+ anterior chamber or vitreous cells, absence of active vitreous or retinal lesions, or resolution of uveitic cystoid macular oedema)

or

- ○ Following each 12-month treatment period, the patient has a sustained steroid sparing effect, allowing reduction in prednisone to < 10mg daily, or steroid drops less than twice daily if under 18 years old

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

I confirm that the above details are correct:

Adalimumab (Humira - Alternative brand) *- continued*

INITIATION – ankylosing spondylitis
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a rheumatologist or Practitioner on the recommendation of a rheumatologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has experienced intolerable side effects from adalimumab (Amgevita) following a minimum of 4 weeks treatment

or

- ○ Patient has developed symptoms of loss of disease control following a minimum of 4 weeks treatment with adalimumab (Amgevita)

and

- ○ Patient has received a maximum of 6 months treatment with Amgevita

and

- ○ Patient has previously had a Special Authority approval for the Humira brand of adalimumab for this indication

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

CONTINUATION – ankylosing spondylitis
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a rheumatologist or Practitioner on the recommendation of a rheumatologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ Treatment has resulted in an improvement in BASDAI of 4 or more points from pre-treatment baseline on a 10 point scale, or an improvement in BASDAI of 50%, whichever is less

and

- ○ Adalimumab to be administered at doses no greater than 40 mg every 14 days

INITIATION – Arthritis – oligoarticular course juvenile idiopathic
Re-assessment required after 6 months
Prerequisites (tick boxes where appropriate)

- ○ Prescribed by, or recommended by a named specialist or rheumatologist, or in accordance with a protocol or guideline that has been endorsed by the Te Whatu Ora Hospital.

and

- ○ The patient has experienced intolerable side effects from adalimumab (Amgevita) following a minimum of 4 weeks treatment

or

- ○ Patient has developed symptoms of loss of disease control following a minimum of 4 weeks treatment with adalimumab (Amgevita) and clinician attributes this loss of disease response to a change in treatment regimen

and

- ○ Patient has received a maximum of 6 months treatment with Amgevita

and
