HOSPITAL MEDICINES LIST RESTRICTIONS CHECKLIST

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

PRESCRIBER	PATIENT:			
Name:	Name:			
Ward:	NHI:			
bosentan				
INITIATION – PAH monotherapy Re-assessment required after 6 months Prerequisites (tick boxes where appropriate)				
O Prescribed by, or recommended by a respiratory specialist, cardiologist, rheumatologist or any relevant practitioner on the recommendation of				

Н	lospita		specialist, cardiologist or rheumatologist, or in accordance with a protocol or guideline that has been endorsed by the Health		
(С ғ	Patien	t has pulmonary arterial hypertension (PAH)*		
and (С ғ	PAH is	in Group 1, 4 or 5 of the WHO (Venice 2003) clinical classifications		
and (and	F C	PAH is	in New York Heart Association/World Health Organization (NYHA/WHO) functional class II, III or IV		
anu			O PAH has been confirmed by right heart catheterisation		
		and	m O A mean pulmonary artery pressure (PAPm) greater than 20 mmHg (unless peri Fontan repair)		
		and	${\sf O}$ A pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg		
		and	m O Pulmonary vascular resistance greater than 2 Wood Units or greater than 160 International Units (dyn s cm ⁻⁵)		
		unu	PAH has been demonstrated to be non-responsive in vasoreactivity assessment using iloprost or nitric oxide, as defined in the 2022 ECS/ERS Guidelines for PAH (see note below for link to these guidelines) †		
			Patient has not experienced an acceptable response to calcium antagonist treatment, according to a validated risk stratification tool**		
			or O Patient has PAH other than idiopathic / heritable or drug-associated type		
	or O Patient is a child with PAH secondary to congenital heart disease or PAH due to idiopathic, congenital or developmental lung disorders including severe chronic neonatal lung disease				
	or O Patient has palliated single ventricle congenital heart disease and elevated pulmonary pressures or a major complication of the Fontan circulation requiring the minimising of pulmonary/venous filling pressures				
and		\cap ,			
	O Bosentan is to be used as PAH monotherapy and				
		O Patient has experienced intolerable side effects on sildenafil			
	or O Patient has an absolute contraindication to sildenafil

HOSPITAL MEDICINES LIST RESTRICTIONS CHECKLIST

Use this checklist to determine if a patient meets the restrictions for funding in the hospital setting. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

PRESCRIBER	PATIENT:						
Name:	Name:						
Ward:	NHI:						
bosentan - continued							
CONTINUATION Re-assessment required after 2 years							
Prerequisites (tick box where appropriate)							
O Prescribed by, or recommended by a respiratory specialist, cardiologist, rheumatologist or any relevant practitioner on the recommendation of a respiratory specialist, cardiologist or rheumatologist, or in accordance with a protocol or guideline that has been endorsed by the Health NZ Hospital.							

Patient is continuing to derive benefit from bosentan treatment according to a validated PAH risk stratification tool**

Note: † The European Respiratory Journal Guidelines can be found here: 2022 ECS/ERS Guidelines for the diagnosis and treatment of pulmonary hypertension PAH ** the requirement to use a validated risk stratification tool to determine insufficient response applies to adults. Determining insufficient response in children does not require use of a validated PAH risk stratification tool, where currently no such validated tools exist for PAH risk stratification in children.

I confirm that the above details are correct:
