Insulin Pump Consumables - continued

		tion — severe unexplained hypoglycaemia nly from a relevant specialist or nurse practitioner. Approvals valid for 9 months.
Prerec	uisites	(tick boxes where appropriate)
	and	Patient has type 1 diabetes or has undergone a pancreatectomy or has cystic fibrosis-related diabetes
		Has undertaken carbohydrate counting education (either a carbohydrate counting course or direct education from an appropriate health professional)
		Applicant is part of a multidisciplinary team experienced in the management of type 1 diabetes care
	and	Has adhered to an intensive MDI regimen using analogue insulins for at least six months
		Has had four severe unexplained hypoglycaemic episodes over a six month period (severe as defined as requiring the assistance of another person)
	and	Has an average HbA1c between the following range: equal to or greater than 53 mmol/mol and equal to or less than 90 mmol/mol
a	and	Has been evaluated by the multidisciplinary team for their suitability for insulin pump therapy
	0	Applicant is a relevant specialist
		Applicant is a nurse practitioner working within their vocational scope
Renew	val — s	evere unexplained hypoglycaemia
Curren	t appro	val Number (if known):
		nly from a relevant specialist or nurse practitioner. Approvals valid for 2 years. (tick boxes where appropriate)
		Patient is continuing to derive benefit according to the treatment plan agreed at induction of at least a 50% reduction from baseline in hypoglycaemic events
	and	HbA1c has not increased by more than 5 mmol/mol from baseline
	o	Applicant is a relevant specialist
		Applicant is a nurse practitioner working within their vocational scope

Г

pplicat	pplication — HbA1c ions only from a relevant specialist or nurse practitioner. Approvals valid for 9 months. Jisites(tick boxes where appropriate)
	Patient has type 1 diabetes or has undergone a pancreatectomy or has cystic fibrosis-related diabetes
ar	nd
ar	Has undertaken carbohydrate counting education (either a carbohydrate counting course or direct education from an appropriate health professional)
	Applicant is part of a multidisciplinary team experienced in the management of type 1 diabetes care
	Has adhered to an intensive MDI regimen using analogue insulins for at least six months
	Has unpredictable and significant variability in blood glucose including significant hypoglycaemia affecting the ability to reduce HbA1
	In the opinion of the treating clinician, HbA1c could be reduced by at least 10 mmol/mol using insulin pump treatment
	Has typical HbA1c results between the following range: equal to or greater than 65 mmol/mol and equal to or less than 90 mmol/mol and equal to or less than 90 mmol/mol
ar	Has been evaluated by the multidisciplinary team for their suitability for insulin pump therapy
	Applicant is a relevant specialist
	or Applicant is a nurse practitioner working within their vocational scope
	al — HbA1c approval Number (if known):
	ions only from a relevant specialist or nurse practitioner. Approvals valid for 2 years. Jisites (tick boxes where appropriate)
ar	Patient is continuing to derive benefit according to the treatment plan agreed at induction of achieving and maintaining a reduction in HbA1c from baseline of 10 mmol/mol
ar	The number of severe unexplained recurrent hypoglycaemic episodes has not increased from baseline
	Applicant is a relevant specialist
	or Applicant is a nurse practitioner working within their vocational scope

Insulin Pump Consumables - continued

	Patient has type 1 diabetes or has undergone a pancreatectomy or has cystic fibrosis-related diabetes
and	Was already on pump treatment prior to 1 September 2012 and had been evaluated by the multidisciplinary team for their suitability
and	insulin pump therapy at the time of initiating that pump treatment and continues to benefit from pump treatment
	The patient has adhered to an intensive MDI regimen using analogue insulins for at least six months prior to initiating pump therapy
and	The patient is continuing to derive benefit from pump therapy
and	
	The patient had achieved and is maintaining a HbA1c of equal to or less than 80 mmol/mol on pump therapy
and	The patient has had no increase in severe unexplained hypoglycaemic episodes from baseline
and	
and	The patient's HbA1c has not deteriorated more than 5 mmol/mol from baseline
	Applicant is a relevant specialist
C	Applicant is a nurse practitioner working within their vocational scope

Applications only from a relevant specialist or nurse practitioner.	Approvals valid for 2 years
Prerequisites(tick boxes where appropriate)	

and	The patient is continuing to derive benefit according to the treatment plan and has maintained a HbA1c of equal to or less tha 80 mmol/mol	an
	The patient's HbA1c has not deteriorated more than 5 mmol/mol from initial application	
and and	The patient has not had an increase in severe unexplained hypoglycaemic episodes from baseline	
	Applicant is a relevant specialist	
	Applicant is a nurse practitioner working within their vocational scope
