## RS1827 - Pegylated interferon alfa-2a

Chronic Hepatitis C - genotype 1 infection treatment more than 4 years prior - INITIATION	
Chronic hepatitis C - genotype 1, 4, 5 or 6 infection or co-infection with HIV or genotype 2 or 3 post liver transplar - INITIATION	
Chronic hepatitis C - genotype 2 or 3 infection without co-infection with HIV - INITIATIONHepatitis B - INITIATION	
Myeloproliferative disorder or cutaneous T cell lymphoma - INITIATION	.3
Ocular surface squamous neoplasia - INITIATIÓN  Ocular surface squamous neoplasia - CONTINUATION	. 4
Post-allogenic bone marrow transplant - INITIATION  Post-allogenic bone marrow transplant - CONTINUATION	. 4

I confirm that the above details are correct:

## HOSPITAL MEDICINES LIST RESTRICTIONS CHECKLIST

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

PRESCRIBER	PATIENT:
Name:	Name:
Ward:	NHI:
Pegylated interferon alfa-2a	
INITIATION – Chronic hepatitis C - genotype 1, 4, 5 or 6 infection or co-in Re-assessment required after 48 weeks  Prerequisites (tick boxes where appropriate)	fection with HIV or genotype 2 or 3 post liver transplant
Patient has chronic hepatitis C, genotype 1, 4, 5 or 6 infection or  Patient has chronic hepatitis C and is co-infected with HIV or  Patient has chronic hepatitis C genotype 2 or 3 and has receiv  Note: Consider stopping treatment if there is absence of a virological respons treatment since this is predictive of treatment failure.  Consider reducing treatment to 24 weeks if serum HCV RNA level at Week 4 serum HCV RNA is less than 400,000IU/ml.  CONTINUATION – Chronic hepatitis C - genotype 1 infection  Re-assessment required after 48 weeks  Prerequisites (tick boxes where appropriate)  Prescribed by, or recommended by a gastroenterologist, infectious d guideline that has been endorsed by the Health NZ Hospital.  and  Patient has chronic hepatitis C, genotype 1  and  Patient has had previous treatment with pegylated interferon a and	e (defined as at least a 2-log reduction in viral load) following 12 weeks of is undetectable by sensitive PCR assay (less than 50IU/ml) AND Baseline isease specialist or general physician, or in accordance with a protocol or
Patient has responder relapsed  Patient was a partial responder  and  Patient is to be treated in combination with boceprevir	
INITIATION – Chronic Hepatitis C - genotype 1 infection treatment more to Re-assessment required after 48 weeks  Prerequisites (tick boxes where appropriate)  Prescribed by, or recommended by a gastroenterologist, infectious diguideline that has been endorsed by the Health NZ Hospital.  Patient has chronic hepatitis C, genotype 1  and	than 4 years prior isease specialist or general physician, or in accordance with a protocol or
Patient has had previous treatment with pegylated interferon a and  Patient has responder relapsed or Patient was a partial responder  Patient received interferon treatment prior to 2004	nd ribavirin
Patient is to be treated in combination with boceprevir	

I confirm that the above details are correct:

## HOSPITAL MEDICINES LIST RESTRICTIONS CHECKLIST

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

PRESCRIBER	PATIENT:
lame: Name:	
Ward:	NHI:
Pegylated interferon alfa-2a - continued	
INITIATION – Chronic hepatitis C - genotype 2 or 3 infection without c Re-assessment required after 6 months	o-infection with HIV
Prerequisites (tick box where appropriate)	
O Patient has chronic hepatitis C, genotype 2 or 3 infection	
INITIATION – Hepatitis B Re-assessment required after 48 weeks	
Prerequisites (tick boxes where appropriate)	
Prescribed by, or recommended by a gastroenterologist, infectious guideline that has been endorsed by the Health NZ Hospital.	s disease specialist or general physician, or in accordance with a protocol or
Patient has confirmed Hepatitis B infection (HBsAg positive	for more than 6 months)
Patient is Hepatitis B treatment-naive	
ALT > 2 times Upper Limit of Normal	
and HBV DNA < 10 log10 IU/ml and	
O HBeAg positive	
Serum HBV DNA greater than or equal to 2,000 units moderate fibrosis)	s/ml and significant fibrosis (greater than or equal to Metavir Stage F2 or
and Compensated liver disease	
No continuing alcohol abuse or intravenous drug use	
Not co-infected with HCV, HIV or HDV	
O Neither ALT nor AST > 10 times upper limit of normal and	
O No history of hypersensitivity or contraindications to pegyla	ted interferon
INITIATION – myeloproliferative disorder or cutaneous T cell lymphon Re-assessment required after 12 months Prerequisites (tick boxes where appropriate)	na
O Patient has a cutaneous T cell lymphoma*	
Patient has a myeloproliferative disorder*	
Patient is intolerant of hydroxyurea	
Treatment with anagrelide and busulfan is not clinical	ly appropriate
O Patient has a myeloproliferative disorder	
O Patient is pregnant, planning pregnancy or lactating	

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

PRESCRIBER PATIENT:		
Name: Name:		
Ward: NHI:		
Pegylated interferon alfa-2a - continued		
CONTINUATION – myeloproliferative disorder or cutaneous T cell lymphoma Re-assessment required after 12 months  Prerequisites (tick boxes where appropriate)  One evidence of disease progression  and One the treatment remains appropriate and patient is benefitting from treatment  and One Patient has a cutaneous T cell lymphoma*  One Patient has a myeloproliferative disorder*  and One Remains intolerant of hydroxyurea and treatment with anagrelide and busulfan remains clinically inappropriate  One Patient is pregnant, planning pregnancy or lactating		
Note: Indications marked with * are unapproved indications		
INITIATION – ocular surface squamous neoplasia Re-assessment required after 12 months Prerequisites (tick box where appropriate)  O Prescribed by, or recommended by an ophthalmologist, or in accordance with a protocol or guideline that has been endorsed by the Health NZ Hospital.  and O Patient has ocular surface squamous neoplasia*		
CONTINUATION – ocular surface squamous neoplasia Re-assessment required after 12 months Prerequisites (tick box where appropriate)  O Prescribed by, or recommended by an ophthalmologist, or in accordance with a protocol or guideline that has been endorsed by the Health NZ Hospital.  and O The treatment remains appropriate and patient is benefitting from treatment Note: Indications marked with * are unapproved indications		
INITIATION – post-allogenic bone marrow transplant Re-assessment required after 3 months Prerequisites (tick box where appropriate)  O Patient has received an allogeneic bone marrow transplant* and has evidence of disease relapse		
CONTINUATION – post-allogenic bone marrow transplant Re-assessment required after 3 months Prerequisites (tick box where appropriate)  O Patient is responding and ongoing treatment remains appropriate Note: Indications marked with * are unapproved indications		

I confirm that the above details are correct:
