HOSPITAL MEDICINES LIST RESTRICTIONS CHECKLIST

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

PRESCRIBER	PATIENT:
Name:	Name:
Ward:	NHI:
Omalizumab	
INITIATION – severe asthma Re-assessment required after 6 months Prerequisites (tick boxes where appropriate) Prescribed by, or recommended by a clinical immunologist or respire endorsed by the Health NZ Hospital.	atory specialist, or in accordance with a protocol or guideline that has been
	L and 1300 IU/ml at baseline dose inhaled corticosteroid (budesonide 1,600 mcg per day or long-acting beta-2 agonist therapy (at least salmeterol 50 mcg bd or
Patient has received courses of systemic corticosteroids contraindicated or not tolerated Patient has had at least 4 exacerbations needing system defined as either documented use of oral corticosteroids and Patient has an Asthma Control Test (ACT) score of 10 or less and	the ACT and oral corticosteroid dose must be made at the time of
CONTINUATION – severe asthma Re-assessment required after 6 months Prerequisites (tick boxes where appropriate) Or Prescribed by, or recommended by a respiratory specialist, or in accordance with a protocol or guideline that has been endorsed by the Health NZ Hospital. An increase in the Asthma Control Test (ACT) score of at least 5 from baseline A reduction in the maintenance oral corticosteroid dose or number of exacerbations of at least 50% from baseline	

 Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

PRESCRIBER	PATIENT:
Name:	Name:
Ward:	NHI:
Omalizumab - continued	
INITIATION – severe chronic spontaneous urticaria Re-assessment required after 6 months Prerequisites (tick boxes where appropriate) O Prescribed by, or recommended by a clinical immunologist or derminendorsed by the Health NZ Hospital. and	atologist, or in accordance with a protocol or guideline that has been
Patient must be aged 12 years or older	
Patient is symptomatic with Urticaria Activity Scoand Patient has a Dermatology life quality index (DLC	
and	
or 6 weeks	4 times standard dose) and ciclosporin (> 3 mg/kg day) for at least 4 times standard dose) and at least 3 courses of systemic corticosteroids previous 6 months
O Patient has developed significant adverse effects whilst	t on corticosteroids or ciclosporin
and O Treatment to be stopped if inadequate response* follow or O Complete response* to 6 doses of omalizumab	ring 4 doses
CONTINUATION – severe chronic spontaneous urticaria Re-assessment required after 6 months Prerequisites (tick boxes where appropriate) O Prescribed by, or recommended by a clinical immunologist or dermatologist, or in accordance with a protocol or guideline that has been endorsed by the Health NZ Hospital. O Patient has previously had a complete response* to 6 doses of omalizumab or O Patient has previously had a complete response* to 6 doses of omalizumab and Patient has relapsed after cessation of omalizumab therapy Note: *Inadequate response defined as less than 50% reduction in baseline UAS7 and DLQI score, or an increase in Urticaria Control Test (UCT) score of less than 4 from baseline. Patient is to be reassessed for response after 4 doses of omalizumab. Complete response is defined as UAS7 less than or equal to 6 and DLQI less than or equal to 5; or UCT of 16. Relapse of chronic urticaria on stopping prednisone/ciclosporin does not justify the funding of omalizumab.	

I confirm that the above details are correct:
