HOSPITAL MEDICINES LIST RESTRICTIONS CHECKLIST

August 2025

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

Schedule. For community funding, see the Special Authority Criteria.	
PRESCRIBER	PATIENT:
Name:	Name:
Ward:	NHI:
Deferasirox	
INITIATION Re-assessment required after 2 years Prerequisites (tick boxes where appropriate) O Prescribed by, or recommended by a haematologist, or in accordate Hospital. and The patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with chronic iron overload or service in the patient has been diagnosed with the patient has been diagnosed w	ance with a protocol or guideline that has been endorsed by the Health NZ
have proven ineffective as measured by serum ferriting Treatment with deferiprone has resulted in severe per Treatment with deferiprone has resulted in arthritis or Treatment with deferiprone is contraindicated due to a	one monotherapy or deferiprone and desferrioxamine combination therapy in levels, liver or cardiac MRI T2*
Hospital. O For the first renewal following 2 years of therapy, the treatment parameters namely serum ferritin, cardiac MRI T2* and liver or	and has resulted in clinical stability or continued improvement in all three

I confirm that the above details are correct:
