I confirm that the above details are correct:

Signed: Date:

HOSPITAL MEDICINES LIST RESTRICTIONS CHECKLIST

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

PRES	CRIBER		PATIENT:
Name	:		Name:
Ward:			NHI:
Obin	utuzum	nab	
Re-a	equisites	nt required after 6 months (tick boxes where appropriate)	
and	→ Preso Hosp		cordance with a protocol or guideline that has been endorsed by the Health NZ
	and	The patient has progressive Binet stage A, B or C CD2	20+ chronic lymphocytic leukaemia requiring treatment
	and	The patient is obinutuzumab treatment naive	
	and	The patient is not eligible for full dose FCR due to come reduced renal function (creatinine clearance < 70mL/m	orbidities with a score > 6 on the Cumulative Illness Rating Scale (CIRS) or iin)
	O	Patient has adequate neutrophil and platelet counts* ur	nless the cytopenias are a consequence of marrow infiltration by CLL
	and	Patient has good performance status	
	and	Obinutuzumab to be administered at a maximum cumu 6 cycles	lative dose of 8,000 mg and in combination with chlorambucil for a maximum of
illnes symp	s/impairm otoms a hi	ent in the patient. 'Good performance status' means EC gher ECOG (2 or 3) is acceptable where treatment with	obinutuzumab is expected to improve symptoms and improve ECOG score to < 2.
illnes symp * grea iNITI Re-as	s/impairm otoms a hi ater than o ATION – 1 ssessmer	nent in the patient. 'Good performance status' means EC	COG score of 0-1, however, in patients temporarily debilitated by their CLL disease obinutuzumab is expected to improve symptoms and improve ECOG score to < 2.
illnes symp * grea iNITI Re-as	s/impairm otoms a hi ater than o ATION – 1 ssessmer	tent in the patient. 'Good performance status' means EC gher ECOG (2 or 3) is acceptable where treatment with or equal to 1.5 × 10 ⁹ /L and platelets greater than or equal follicular / marginal zone lymphoma at required after 9 months (tick boxes where appropriate)	COG score of 0-1, however, in patients temporarily debilitated by their CLL disease obinutuzumab is expected to improve symptoms and improve ECOG score to < 2.
illnes symp * grea iNITI Re-as	s/impairm otoms a hi ater than o ATION – 1 ssessmer	nent in the patient. 'Good performance status' means EC gher ECOG (2 or 3) is acceptable where treatment with or equal to 1.5 × 10 ⁹ /L and platelets greater than or equal follicular / marginal zone lymphoma at required after 9 months (tick boxes where appropriate) Patient has follicular lymphoma	COG score of 0-1, however, in patients temporarily debilitated by their CLL disease obinutuzumab is expected to improve symptoms and improve ECOG score to < 2.
illnes symp * grea iNITI Re-as	ATION – 1 ssessmen equisites or	nent in the patient. 'Good performance status' means EC gher ECOG (2 or 3) is acceptable where treatment with or equal to 1.5 × 10 ⁹ /L and platelets greater than or equal follicular / marginal zone lymphoma at required after 9 months (tick boxes where appropriate) Patient has follicular lymphoma Patient has marginal zone lymphoma	COG score of 0-1, however, in patients temporarily debilitated by their CLL disease obinutuzumab is expected to improve symptoms and improve ECOG score to < 2.
illnes symp * grea iNITI Re-as	ATION – 1 ssessmen equisites or and and	nent in the patient. 'Good performance status' means EC gher ECOG (2 or 3) is acceptable where treatment with or equal to 1.5 × 10 ⁹ /L and platelets greater than or equal follicular / marginal zone lymphoma at required after 9 months (tick boxes where appropriate) Patient has follicular lymphoma Patient has marginal zone lymphoma	COG score of 0-1, however, in patients temporarily debilitated by their CLL disease obinutuzumab is expected to improve symptoms and improve ECOG score to < 2. al to 75 × 10 ⁹ /L
illnes symp * grea iNITI Re-as	ATION – 1 ssessmen equisites or and and and	nent in the patient. 'Good performance status' means EC gher ECOG (2 or 3) is acceptable where treatment with or equal to 1.5 × 10 ⁹ /L and platelets greater than or equal follicular / marginal zone lymphoma at required after 9 months (tick boxes where appropriate) Patient has follicular lymphoma Patient has marginal zone lymphoma Patient is refractory to or has relapsed within 12 months	COG score of 0-1, however, in patients temporarily debilitated by their CLL disease obinutuzumab is expected to improve symptoms and improve ECOG score to < 2. al to 75 × 10 ⁹ /L
illnes symp * grea iNITI Re-as	ATION – 1 ssessmen equisites or and and	lent in the patient. 'Good performance status' means EC gher ECOG (2 or 3) is acceptable where treatment with or equal to 1.5 × 10 ⁹ /L and platelets greater than or equal follicular / marginal zone lymphoma at required after 9 months (tick boxes where appropriate) O Patient has follicular lymphoma Patient has marginal zone lymphoma Patient has marginal zone lymphoma Patient has an ECOG performance status of 0-2 Patient has been previously treated with no more than the status of the	COG score of 0-1, however, in patients temporarily debilitated by their CLL disease obinutuzumab is expected to improve symptoms and improve ECOG score to < 2. al to 75 × 10 ⁹ /L
illnes symp * grea INITI. Re-a:	and	lent in the patient. 'Good performance status' means EC gher ECOG (2 or 3) is acceptable where treatment with or equal to 1.5 × 10 ⁹ /L and platelets greater than or equal follicular / marginal zone lymphoma at required after 9 months (tick boxes where appropriate) O Patient has follicular lymphoma Patient has marginal zone lymphoma Patient has marginal zone lymphoma Patient has an ECOG performance status of 0-2 Patient has been previously treated with no more than the status of the	COG score of 0-1, however, in patients temporarily debilitated by their CLL disease obinutuzumab is expected to improve symptoms and improve ECOG score to < 2. al to 75 × 10 ⁹ /L s of a rituximab containing combined chemo-immunotherapy regimen*
illnes symp * grea INITI. Re-a: Prere	and	lent in the patient. 'Good performance status' means EC gher ECOG (2 or 3) is acceptable where treatment with or equal to 1.5 × 10 ⁹ /L and platelets greater than or equal follicular / marginal zone lymphoma at required after 9 months (tick boxes where appropriate) O Patient has follicular lymphoma Patient has marginal zone lymphoma Patient has marginal zone lymphoma Patient has marginal zone lymphoma Patient has an ECOG performance status of 0-2 Patient has been previously treated with no more than an ECOG performance at a maximum dose	COG score of 0-1, however, in patients temporarily debilitated by their CLL disease obinutuzumab is expected to improve symptoms and improve ECOG score to < 2. al to 75 × 10 ⁹ /L s of a rituximab containing combined chemo-immunotherapy regimen*
illnes symp * grea INITI. Re-a: Prere	and on an	lent in the patient. 'Good performance status' means EC gher ECOG (2 or 3) is acceptable where treatment with or equal to 1.5 × 10 ⁹ /L and platelets greater than or equal follicular / marginal zone lymphoma at required after 9 months (tick boxes where appropriate) O Patient has follicular lymphoma Patient has marginal zone lymphoma Patient is refractory to or has relapsed within 12 months Patient has an ECOG performance status of 0-2 Patient has been previously treated with no more than to the companies of the companies o	SOG score of 0-1, however, in patients temporarily debilitated by their CLL disease obinutuzumab is expected to improve symptoms and improve ECOG score to < 2. al to 75 × 10 ⁹ /L s of a rituximab containing combined chemo-immunotherapy regimen* four chemotherapy regimens of 1000 mg for a maximum of 6 cycles in combination with chemotherapy*
illnes symp * grea INITI. Re-a: Prere	and	nent in the patient. 'Good performance status' means EC gher ECOG (2 or 3) is acceptable where treatment with or equal to 1.5 × 10 ⁹ /L and platelets greater than or equal follicular / marginal zone lymphoma at required after 9 months (tick boxes where appropriate) Patient has follicular lymphoma Patient has marginal zone lymphoma Patient is refractory to or has relapsed within 12 months. Patient has an ECOG performance status of 0-2 Patient has been previously treated with no more than to the companies of	cog score of 0-1, however, in patients temporarily debilitated by their CLL disease obinutuzumab is expected to improve symptoms and improve ECOG score to < 2. al to 75 × 10 ⁹ /L s of a rituximab containing combined chemo-immunotherapy regimen* four chemotherapy regimens of 1000 mg for a maximum of 6 cycles in combination with chemotherapy*
