HOSPITAL MEDICINES LIST RESTRICTIONS CHECKLIST

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

	Name:
	NII II.
	INTI:
sirox	
ON ssment required after 2 years isites (tick boxes where appropriate) Prescribed by, or recommended by a haematologist, or in accordance Hospital.	be with a protocol or guideline that has been endorsed by the Health NZ
have proven ineffective as measured by serum ferritin le	monotherapy or deferiprone and desferrioxamine combination therapy
O Treatment with deferiprone has resulted in severe persist or O Treatment with deferiprone has resulted in arthritis or O Treatment with deferiprone is contraindicated due to a h	istory of agranulocytosis (defined as an absolute neutrophil count ter than 2 episodes) of moderate neutropenia (ANC 0.5 - 1.0 cells per
UATION ssment required after 2 years isites (tick boxes where appropriate) Prescribed by, or recommended by a haematologist, or in accordance Hospital.	ce with a protocol or guideline that has been endorsed by the Health NZ
parameters namely serum ferritin, cardiac MRI T2* and liver N	nd has resulted in clinical stability or continued improvement in all three
d d	Prescribed by, or recommended by a haematologist, or in accordance Hospital. The patient has been diagnosed with chronic iron overload du Deferasirox is to be given at a daily dose not exceeding 40 mg Treatment with maximum tolerated doses of deferiprone have proven ineffective as measured by serum ferritin le or Treatment with deferiprone has resulted in severe persis or Treatment with deferiprone has resulted in arthritis or Treatment with deferiprone is contraindicated due to a h (ANC) of < 0.5 cells per µL) or recurrent episodes (great µL) DATION sment required after 2 years sites (tick boxes where appropriate) Prescribed by, or recommended by a haematologist, or in accordance Hospital. For the first renewal following 2 years of therapy, the treatment parameters namely serum ferritin, cardiac MRI T2* and liver Maximum parameters namely serum ferritin, cardiac MRI T2* and liver Maximum parameters namely serum ferritin, cardiac MRI T2* and liver Maximum parameters namely serum ferritin, cardiac MRI T2* and liver Maximum parameters namely serum ferritin, cardiac MRI T2* and liver Maximum parameters namely serum ferritin, cardiac MRI T2* and liver Maximum parameters namely serum ferritin, cardiac MRI T2* and liver Maximum parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely serum ferritin has been tolerated and the parameters namely s
