I confirm that the above details are correct:

Signed: Date:

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

PRESCRIBER	PATIENT:
Name:	Name:
Ward:	NHI:
Sunitinib	
INITIATION – RCC Re-assessment required after 4 months Prerequisites (tick boxes where appropriate)	
The patient has metastatic renal cell carcinoma The patient has not previously received funded sunitinib	
CONTINUATION – RCC Re-assessment required after 4 months Prerequisites (tick box where appropriate) O No evidence of disease progression	
INITIATION – GIST Re-assessment required after 3 months Prerequisites (tick boxes where appropriate)	
The patient has unresectable or metastatic malignant gastroin The patient's disease has progressed following treatment or The patient has documented treatment-limiting intolerance.	nt with imatinib
CONTINUATION – GIST Re-assessment required after 6 months Prerequisites (tick boxes where appropriate)	
Prerequisites (tick boxes where appropriate)	
	as determined by Choi's modified CT response evaluation criteria as
The patient has responded to treatment or has stable disease a follows: The patient has had a complete response (disappearant or The patient has had a partial response (a decrease in si (HU) of 15% or more on CT and no new lesions and no	ce of all lesions and no new lesions) ze of 10% or more or decrease in tumour density in Hounsfield Units obvious progression of non-measurable disease) ne two above) and does not have progressive disease and no
The patient has responded to treatment or has stable disease a follows: The patient has had a complete response (disappearant or The patient has had a partial response (a decrease in si (HU) of 15% or more on CT and no new lesions and no or The patient has stable disease (does not meet criteria the content of the patient has stable disease)	ce of all lesions and no new lesions) ze of 10% or more or decrease in tumour density in Hounsfield Units obvious progression of non-measurable disease) ne two above) and does not have progressive disease and no on
The patient has responded to treatment or has stable disease a follows: The patient has had a complete response (disappearance or Or The patient has had a partial response (a decrease in single (HU) of 15% or more on CT and no new lesions and no Or Or The patient has stable disease (does not meet criteria the symptomatic deterioration attributed to tumour progression and Or	ce of all lesions and no new lesions) ze of 10% or more or decrease in tumour density in Hounsfield Units obvious progression of non-measurable disease) ne two above) and does not have progressive disease and no on
The patient has responded to treatment or has stable disease a follows: The patient has had a complete response (disappearance) The patient has had a partial response (a decrease in single (HU) of 15% or more on CT and no new lesions and note) The patient has stable disease (does not meet criteriat the symptomatic deterioration attributed to tumour progression and the patient is benefiting. The treatment remains appropriate and the patient is benefiting. CONTINUATION – GIST pandemic circumstances Re-assessment required after 6 months	ce of all lesions and no new lesions) ze of 10% or more or decrease in tumour density in Hounsfield Units obvious progression of non-measurable disease) ne two above) and does not have progressive disease and no on g from treatment testinal stromal tumour (GIST)
The patient has responded to treatment or has stable disease a follows: The patient has had a complete response (disappearant or Or The patient has had a partial response (a decrease in sinch (HU) of 15% or more on CT and no new lesions and no Or The patient has stable disease (does not meet criteriat the symptomatic deterioration attributed to tumour progression and Or The treatment remains appropriate and the patient is benefiting. CONTINUATION – GIST pandemic circumstances Re-assessment required after 6 months Prerequisites (tick boxes where appropriate) The patient has unresectable or metastatic malignant gastroin and The patient is clinically benefiting from treatment and continued.	ce of all lesions and no new lesions) ze of 10% or more or decrease in tumour density in Hounsfield Units obvious progression of non-measurable disease) ne two above) and does not have progressive disease and no on g from treatment testinal stromal tumour (GIST) d treatment remains appropriate

HOSPITAL MEDICINES LIST RESTRICTIONS CHECKLIST

Use this checklist to determine if a patient meets the restrictions for funding in the **hospital setting**. For more details, refer to Section H of the Pharmaceutical Schedule. For community funding, see the Special Authority Criteria.

PRESCRIBER	PATIENT:
Name:	Name:
Ward:	NHI:

Sunitinib - continued

Note: GIST - It is recommended that response to treatment be assessed using Choi's modified CT response evaluation criteria (J Clin Oncol, 2007, 25:1753-1759). Progressive disease is defined as either: an increase in tumour size of 10% or more and not meeting criteria of partial response (PR) by tumour density (HU) on CT; or: new lesions, or new intratumoral nodules, or increase in the size of the existing intratumoral nodules.
