APPLICATION FOR SUBSIDY BY SPECIAL AUTHORITY

Page 1 Form SA2408 August 2025

APPLICANT (stamp or sticker acceptable)	PATIENT NHI:	REFERRER Reg No:
Reg No:	First Names:	First Names:
Name:	Surname:	Surname:
Address:	DOB:	Address:
	Address:	
Fax Number:		Fax Number:
Empagliflozin; Empagliflozin with met	formin hydrochloride	
Initial application — heart failure reduced ejection fraction Applications from any relevant practitioner. Approvals valid without further renewal unless notified. Prerequisites(tick boxes where appropriate)		
Patient has heart failure		
Patient is in NYHA functional class II or III or IV		
Patient has a documented left ventricular ejection fraction (LVEF) of less than or equal to 40%		
An ECHO is not reasonably practicable, and in the opinion of the treating practitioner the patient would benefit from treatment		
and Patient is receiving concomitant optimal standard funded chronic heart failure treatment		
Patient has type 2 diabetes and Patient is Māori or any or Patient has pre-existir or Patient has an absolu assessment calculato or Patient has a high life young adult* or Patient has diabetic ki and Target HbA1c (of 53 mmol/r agent (e.g. metformin, vilda Note: * Criteria intended to describe patients at high	ng cardiovascular disease or risk equivalent (see note te 5-year cardiovascular disease risk of 15% or great r* time cardiovascular risk due to being diagnosed with idney disease (see note b)* mol or less) has not been achieved despite the regula gliptin, or insulin) for at least 3 months	type 2 diabetes during childhood or as a auruse of at least one blood-glucose lowering abetes.
 a) Pre-existing cardiovascular disease or risk equivalent defined as: prior cardiovascular disease event (i.e. angina, myocardial infarction, percutaneous coronary intervention, coronary artery bypass grafting, transient ischaemic attack, ischaemic stroke, peripheral vascular disease), congestive heart failure or familial hypercholesterolaemia. 		
b) Diabetic kidney disease defined as: persistent albuminuria (albumin:creatinine ratio greater than or equal to 3 mg/mmol, in at least two out of three samples over a 3-6 month period) and/or eGFR less than 60 mL/min/1.73m2 in the presence of diabetes, without alternative cause.		
c) Funded [empagliflozin / empagliflozin with metformin hydrochloride] treatment is not to be given in combination with a funded GLP-1 unless receiving (empagliflozin / empagliflozin with metformin hydrochloride] for the treatment of heart failure.		

I confirm the above details are correct and that in signing this form I understand I may be audited.
