Pembrolizumab

Initial application — stage III or IV resectable melanoma - neoadjuvant

Applications only from a relevant specialist or any relevant practitioner on the recommendation of a relevant specialist. Approvals valid for 4 months.

Prerequisites(tick boxes where appropriate)

- The individual has resectable stage IIIB, IIIC, IIID or IV melanoma (excluding uveal) (see note)
- and**
- The individual has not received prior funded systemic treatment in the perioperative setting for their stage IIIB, IIIC, IIID or IV melanoma
- and**
- Treatment must be prior to complete surgical resection
- and**
- Pembrolizumab must be administered as monotherapy
- and**
- The individual has ECOG performance score 0-2
- and**
- Pembrolizumab to be administered at a fixed dose of 200 mg every 3 weeks (or equivalent)

I confirm the above details are correct and that in signing this form I understand I may be audited.

Pembrolizumab - continued

Initial application — non-small cell lung cancer first-line monotherapy

Applications only from a medical oncologist or any relevant practitioner on the recommendation of a medical oncologist. Approvals valid for 4 months.

Prerequisites(tick boxes where appropriate)

- Patient has locally advanced or metastatic, unresectable, non-small cell lung cancer
- and Patient has not had chemotherapy for their disease in the palliative setting
- and Patient has not received prior funded treatment with an immune checkpoint inhibitor for NSCLC
- and For patients with non-squamous histology there is documentation confirming that the disease does not express activating mutations of EGFR or ALK tyrosine kinase unless not possible to ascertain
- and Pembrolizumab to be used as monotherapy
- and
 - There is documentation confirming the disease expresses PD-L1 at a level greater than or equal to 50% as determined by a validated test unless not possible to ascertain
 - or
 - There is documentation confirming the disease expresses PD-L1 at a level greater than or equal to 1% as determined by a validated test unless not possible to ascertain
 - and Chemotherapy is determined to be not in the best interest of the patient based on clinician assessment
- and Patient has an ECOG 0-2
- and Pembrolizumab to be used at a maximum dose of 200 mg every three weeks (or equivalent) for a maximum of 16 weeks
- and Baseline measurement of overall tumour burden is documented clinically and radiologically

I confirm the above details are correct and that in signing this form I understand I may be audited.

Pembrolizumab - continued

Renewal — non-small cell lung cancer first line monotherapy

Current approval Number (if known):.....

Applications only from a medical oncologist or any relevant practitioner on the recommendation of a medical oncologist. Approvals valid for 4 months.

Prerequisites(tick boxes where appropriate)

Patient's disease has had a complete response to treatment
or
 Patient's disease has had a partial response to treatment
or
 Patient has stable disease

and
 Response to treatment in target lesions has been determined by comparable radiologic assessment following the most recent treatment period

and
 No evidence of disease progression

and
 The treatment remains clinically appropriate and patient is benefitting from treatment

and
 Pembrolizumab to be used at a maximum dose of 200 mg every three weeks (or equivalent)

and
 Treatment with pembrolizumab to cease after a total duration of 24 months from commencement (or equivalent of 35 cycles dosed every 3 weeks)

Initial application — non-small cell lung cancer first-line combination therapy

Applications only from a medical oncologist or any relevant practitioner on the recommendation of a medical oncologist. Approvals valid for 4 months.

Prerequisites(tick boxes where appropriate)

Patient has locally advanced or metastatic, unresectable, non-small cell lung cancer

and
 The patient has not had chemotherapy for their disease in the palliative setting

and
 Patient has not received prior funded treatment with an immune checkpoint inhibitor for NSCLC

and
 For patients with non-squamous histology there is documentation confirming that the disease does not express activating mutations of EGFR or ALK tyrosine kinase unless not possible to ascertain

and
 Pembrolizumab to be used in combination with platinum-based chemotherapy

and
 Patient has an ECOG 0-2

and
 Pembrolizumab to be used at a maximum dose of 200 mg every three weeks (or equivalent) for a maximum of 16 weeks

and
 Baseline measurement of overall tumour burden is documented clinically and radiologically

I confirm the above details are correct and that in signing this form I understand I may be audited.

Initial application — breast cancer, advanced

Applications only from a relevant specialist or any relevant practitioner on the recommendation of a relevant specialist. Approvals valid for 6 months.

Prerequisites(tick boxes where appropriate)

Patient is currently on treatment with pembrolizumab and met all remaining criteria prior to commencing treatment

or

Patient has recurrent or de novo unresectable, inoperable locally advanced triple-negative breast cancer (that does not express ER, PR or HER2 IHC3+ or ISH+ [including FISH or other technology])

or

Patient has recurrent or de novo metastatic triple-negative breast cancer (that does not express ER, PR or HER2 IHC3+ or ISH+ [including FISH or other technology])

and

Patient is treated with palliative intent

and

Patient's cancer has confirmed PD-L1 Combined Positive Score (CPS) is greater than or equal to 10

and

Patient has received no prior systemic therapy in the palliative setting

and

Patient has an ECOG score of 0–2

and

Pembrolizumab is to be used in combination with chemotherapy

and

Baseline measurement of overall tumour burden is documented clinically and radiologically

and

Pembrolizumab is to be used at a maximum dose of 200 mg every three weeks (or equivalent) for a maximum of 16 weeks

Initial application — head and neck squamous cell carcinoma

Applications only from a relevant specialist or any relevant practitioner on the recommendation of a relevant specialist. Approvals valid for 4 months.

Prerequisites(tick boxes where appropriate)

- Patient is currently on treatment with pembrolizumab and met all remaining criteria prior to commencing treatment

or

- Patient has recurrent or metastatic head and neck squamous cell carcinoma of mucosal origin (excluding nasopharyngeal carcinoma) that is incurable by local therapies

and

- Patient has not received prior systemic therapy in the recurrent or metastatic setting

and

- Patient has a positive PD-L1 combined positive score (CPS) of greater than or equal to 1

and

- Patient has an ECOG performance score of 0-2

and

- Pembrolizumab to be used in combination with platinum-based chemotherapy
