Sunitinib

Initial application — RCC

Applications from any relevant practitioner. Approvals valid for 4 months.

Prerequisites(tick boxes where appropriate)

- The patient has metastatic renal cell carcinoma
- and**
- The patient has not previously received funded sunitinib

Initial application — GIST

Applications only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 3 months.

Prerequisites(tick boxes where appropriate)

- The patient has unresectable or metastatic malignant gastrointestinal stromal tumour (GIST)
- and**
- The patient's disease has progressed following treatment with imatinib
- or**
- The patient has documented treatment-limiting intolerance, or toxicity to, imatinib

Renewal — RCC

Current approval Number (if known):.....

Applications from any relevant practitioner. Approvals valid for 4 months.

Prerequisites(tick box where appropriate)

- There is no evidence of disease progression

Renewal — GIST

Current approval Number (if known):.....

Applications only from a relevant specialist or medical practitioner on the recommendation of a relevant specialist. Approvals valid for 6 months.

Prerequisites(tick boxes where appropriate)

- The patient has responded to treatment or has stable disease as determined by Choi's modified CT response evaluation criteria as follows:**
- The patient has had a complete response (disappearance of all lesions and no new lesions)
 - or**
 - The patient has had a partial response (a decrease in size of 10% or more or decrease in tumour density in Hounsfield Units (HU) of 15% or more on CT and no new lesions and no obvious progression of non measurable disease)
 - or**
 - The patient has stable disease (does not meet criteria the two above) and does not have progressive disease and no symptomatic deterioration attributed to tumour progression
- and**
- The treatment remains appropriate and the patient is benefiting from treatment

Note: It is recommended that response to treatment be assessed using Choi's modified CT response evaluation criteria (J Clin Oncol, 2007, 25:1753-1759). Progressive disease is defined as either: an increase in tumour size of 10% or more and not meeting criteria of partial response (PR) by tumour density (HU) on CT; or: new lesions, or new intratumoral nodules, or increase in the size of the existing intratumoral nodules.

Sunitinib - *continued*

Renewal — GIST pandemic circumstances

Current approval Number (if known):.....

Applications from any relevant practitioner. Approvals valid for 6 months.

Prerequisites(tick boxes where appropriate)

- The patient has unresectable or metastatic malignant gastrointestinal stromal (GIST)
- and** The patient is clinically benefiting from treatment and continued treatment remains appropriate
- and** Sunitinib is to be discontinued at progression
- and** The regular Special Authority renewal requirements cannot be met due to COVID-19 constraints on the health sector
